

FRANKE SPECIALIST RANGE

Incorporating Decorative Hoods

SIMPLE STEPS TO YOUR PERFECT KITCHEN

From ultra-modern to traditional shaker style, we think that completing your perfect kitchen should be as easy as possible, so this brochure is designed to offer you all the information and inspiration you need to make a selection that complements the way you use your kitchen.

Your handy checklist to choosing your perfect Franke products:

Choosing a sink

- Measure the cabinet width of your kitchen
- Choose the material of sink
- Choose bowl configuration of sink.
If choosing an inset sink, check on the sink profile options. If choosing an undermount sink, decide how you want the worksurface cutting to suit

Adding accessories and extras

- Choose from a range of complementary accessories
- Check which plumbing kit you need to buy to connect the sink to your waste system

Choosing a tap

- Choose from the full range of taps, including instant boiling water and filtered taps
- Check with your retailer/installer that your water pressure requirements will work with your chosen tap

Choosing a hood

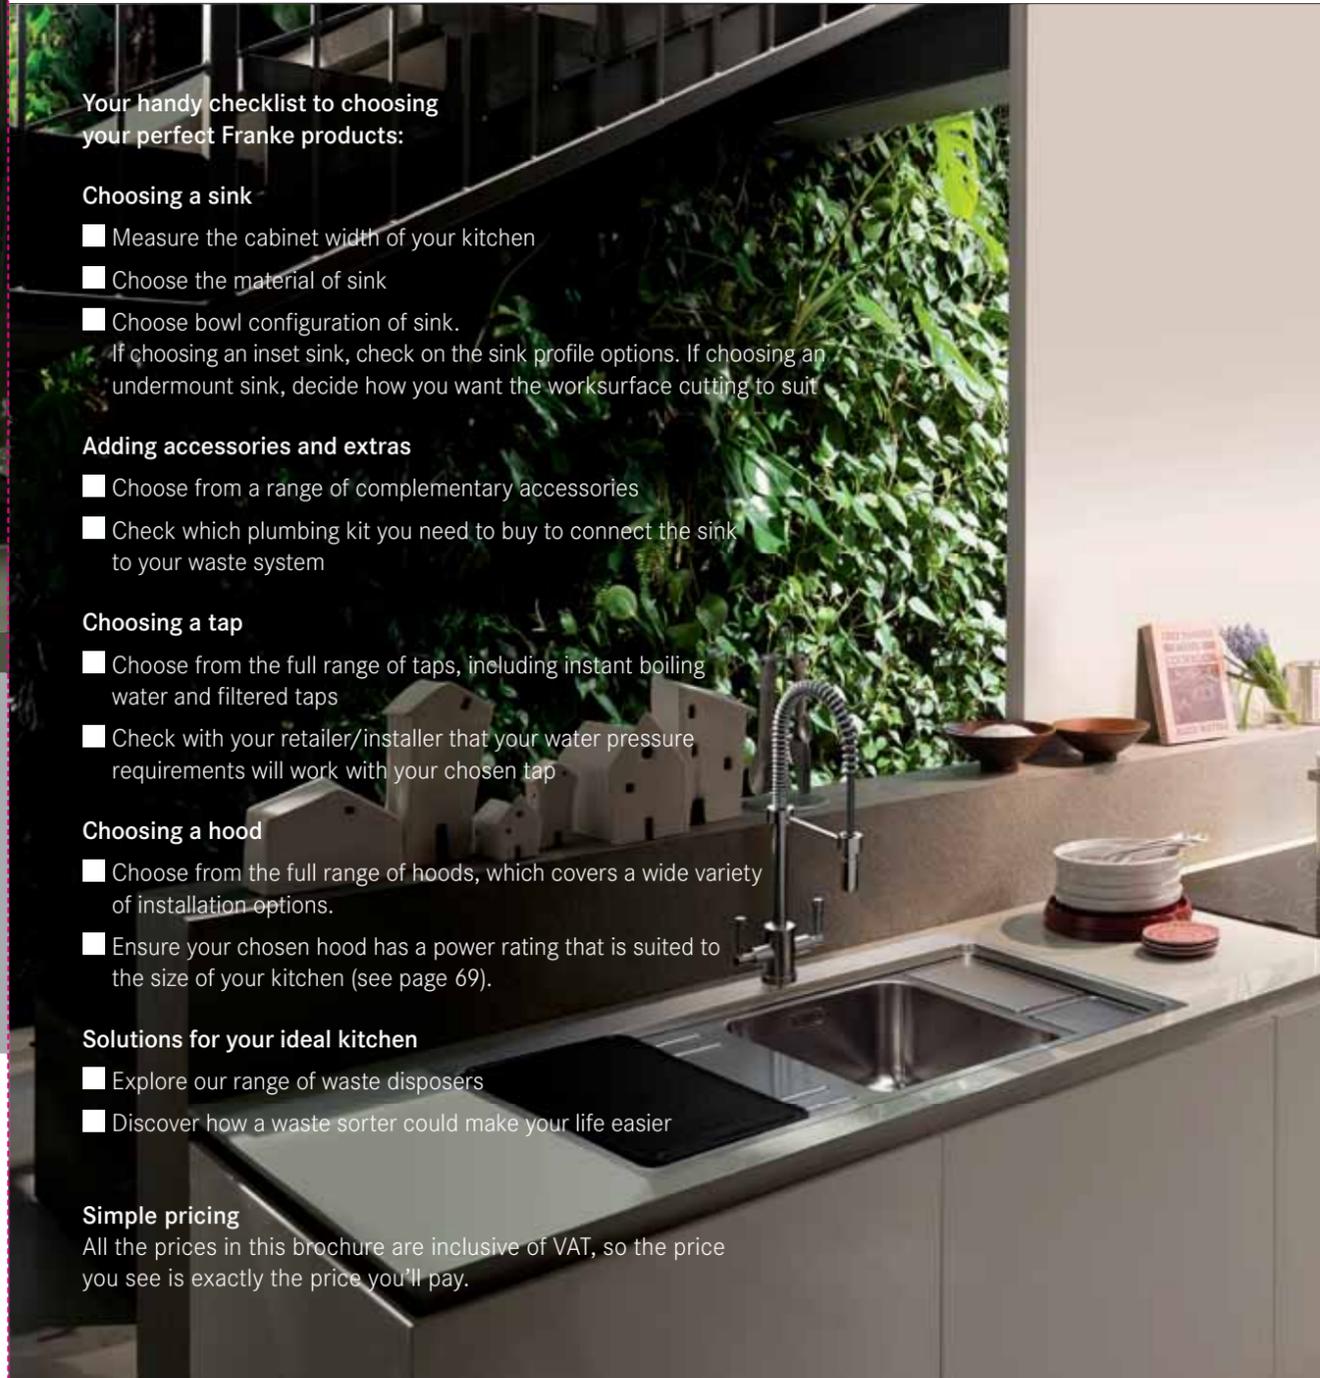

- Choose from the full range of hoods, which covers a wide variety of installation options.
- Ensure your chosen hood has a power rating that is suited to the size of your kitchen (see page 69).

Solutions for your ideal kitchen

- Explore our range of waste disposers
- Discover how a waste sorter could make your life easier

Simple pricing

All the prices in this brochure are inclusive of VAT, so the price you see is exactly the price you'll pay.

Sinks

CABINET WIDTH

The cabinet width measurement denotes the measurement which the sink bowl(s) need to fit into.

SINK STYLE OPTIONS

Inset: The frame of an inset sink sits on top of the worksurface. Compatible with any worksurface, including laminate worktops.

Undermount: An undermount sink is installed underneath the worktop, only compatible with solid surface worktops such as granite or solid wood.

Belfast: Belfast sinks are installed either 'dropped-on' to a purpose built cabinet or by using installation brackets.

INSET SINK PROFILES

Standard: Edge is rolled over to meet the worktop.

Swiss-edge: Edge has a built-in water-protection seal.

Slim-Top: Edge sits flat on the surface of the worktop.

BOWL CONFIGURATION

LHD or RHD: This indicates whether the drainer on the sink is found to the left or to the right of the main bowl.

REV: These reversible designs have a tap hole at the front and back, giving you the freedom to position the sink to provide either a left or right handed drainer.

LHSB & RHSB: For sinks without a drainer but with more than one bowl, this indicates which side the small bowl is positioned.

SINK EXTRAS

Waste Disposal Unit Compatibility: Choice of four units. See page 12 for more details.

Patented Hygienic Overflow: Indicates the sink features a Hygienic Overflow which offers versatility for cleaning.

Plumbing Set Connector included: Some Fraganite 1½ bowl sinks contain a plumbing set connector linking the 2 bowls.

PLUMBING KIT COMPATIBILITY

Siphon 1: Compatible with a single bowl sink.

Siphon 2: Compatible with 1½ bowl and 2 bowl sinks.

Siphon 3: Compatible with 3 bowl sinks.

GUARANTEE

50 Years: Every Franke sink is backed by a 50-year guarantee for your peace of mind.

Taps

WATER PRESSURE

Suitable for Low Pressure Systems: Indicates this tap will work with a low pressure system, delivering at least 4 litres per minute of hot water at 0.3 bar pressure.

FEATURES

LED Lighting: Spout houses LED lights to provide ambient lighting.

SPRAY & NOZZLE TYPES

Pull-Out Spray: Features a pull-out spray, useful for directional rinsing.

Hand Spray: Hand spray mounted into the worktop providing mixed water.

Side Spray: Side spray mounted into worktop providing cold water.

Pull-Out Nozzle: Features a pull-out nozzle, useful for directional rinsing.

Directional Nozzle: The end of the tap can be manipulated in any direction.

WATER OPTIONS

Perlator: Mixes air into the water to give a champagne like flow.

Filtered Water: Dispenses filtered water.

Instant Boiling Water: Dispenses 100°C boiling water, see page 50.

GUARANTEES

5/5 Years: 5 Years moving parts and 5 years coatings and finishes.

5/1 Years: 5 years moving parts and 1 year coatings and finishes.

Hoods

MOTORS & FILTERS

Charcoal Filters: Choose the correct filter for your hood, if it is to be used in recirculatory mode

Types of the motor: Denotes the motor type within the hood.

Filtering Function: Can be installed where no external flue is available.

Filter Saturation Indicator: Indicator light shows when the filter requires maintenance.

FEATURES

Sound Insulation: Indicates the noise level produced by the hood, see page 70 for a full explanation.

Extraction Speed Settings: Motor speed settings. Some models also have an intensive setting for short bursts of extraction when required.

Perimetric Extraction: Offers superior efficiency where air flows around the perimeter of the hood panels.

Continuous 24 Hour ventilation: Provides a constant flow of clean air through the kitchen.

Easy-Fit System: Installation is simple with this innovative mounting system.

ADDITIONAL FEATURES

Digital Display: Illuminated digital display featured on some electronic and touch control models.

Comfort Light: Provides subtle ambient light in the kitchen.

Remote Control: Denotes a model where a remote control operating unit is optional.

Automatic Cut Off Timer: A useful feature is you want to leave the hood running a short while after leaving the kitchen.

GUARANTEE

24 Months: A 24 month guarantee covering parts and labour on all Franke hoods offers complete peace of mind.

Waste Disposal Unit Guarantees

Waste Disposal Unit
8 Years Warranty.

Waste Disposal Unit
10 Years Warranty.

Welcome to the 2014 Specialist Range of sinks, taps and decorative hoods

These days the kitchen is the very heart of the home, a place to express yourself, not only in what you create in the kitchen, but in how you create the kitchen itself. It's a hub, where friends and loved ones gather and it should reflect a personal style. In turn, your kitchen should inspire you.

You will also find a comprehensive range of decorative hoods to complete your kitchen design. Featuring wall mounted, ceiling mounted, island configurations and downdraft options, you can enjoy design freedom, along with the peace of mind that comes with a 24-month guarantee.

Be inspired

Our range is constantly evolving and this brochure simply represents a point in time, offering a snapshot of our offering. Our website, Facebook, Twitter and Pinterest pages are regularly updated with ideas, inspiration and innovations to bring kitchen dreams to life.

FRANKE

Founded in 1911, Franke was built on a foundation of precision engineering, combined with traditional craftsmanship. Over 100 years later, those principles endure, while a focus on the changing needs and lifestyles of our customers has helped us become the world's largest manufacturer of kitchen sinks.

SWISS PRECISION ENGINEERING

Many things have changed in the past century, but what is always the same is a set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart design and stunning beauty.

A century without compromise

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then, we've established efficient and economic manufacturing facilities all around the world.

50 Year 
Guarantee

Innovation is in our DNA

We continue to be passionate innovators and our aim is to constantly improve the look and usability of our designs. Staying at the forefront of the industry is vitally important to us, so we have continually enhanced manufacturing techniques and made pioneering use of new materials to ensure that exciting new design possibilities continue to open up. This means our range is always evolving to include the very highest levels of form and function.

Many of our products have received awards for innovation and design such as the IF and Red Dot awards

Peace of mind with Franke quality

Franke products are built to last. From our commitment to using only the finest quality materials, to the state-of-the-art manufacturing techniques, we have absolute confidence in every product in our range. That's why we're proud to offer a 50-year guarantee against manufacturing defects on our sinks and varying levels of guarantee for other products. Full details can be found on the pull-out flap on the inside cover of this brochure.

Franke More in Store

We believe that the best place to buy our products is in store. That's because you get a friendly face to listen to and offer expert advice. You also get an unrivalled opportunity to see and feel the quality of Franke for yourself.

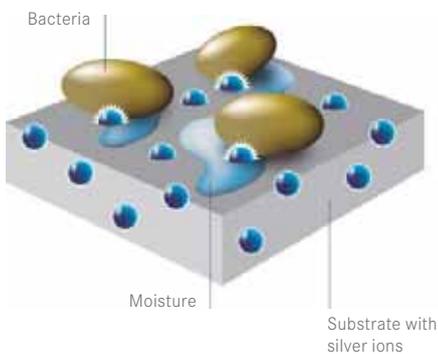

That's why we created More in Store, an initiative to support our retailers in giving you great service and the best possible buying experience. What it means for you is more choice, better quality, more knowledge and unbeatable after sales support.

Look out for stores displaying this logo and you will be assured of genuine, quality products and the high level of service you would expect.

MATERIAL AND FINISH OPTIONS

Different kitchens place different demands on your sink, so our precision-engineered materials each have individual character and unique benefits. They cover everything from the latest trends to traditional favourites, so all you have to do is pick the one that best fits your lifestyle and your personal choice.

Active biocidal substance: silver ions.
The silver ion locates the bacteria via the moisture and deactivates it.

Fragranite treated with Sanitized®

Fragranite is an exceptionally tough material which is highly resistant to burns, dents chips and stains. It was pioneered by Franke and contains 80% granite to form a unique material with a subtle sheen that is warm to the touch.

Kitchens can be a critical location for spreading bacteria and demand special attention to hygiene. On unprotected material, bacteria can multiply every 20 minutes making surfaces unhygienic. The integrated Sanitized® hygiene function in Fragranite sinks helps to keep this area clean and provides the sink with lasting protection. It does not replace normal cleaning but helps to keep surfaces free from bacteria. Tests have proven that Fragranite treated with Sanitized® reduces bacteria and microbe growth by 99%.

Stainless Steel

Franke stainless steel sinks are made from premium quality chrome nickel steel, which looks stunningly beautiful, is highly resistant to staining, rust and corrosion - plus it won't chip, craze, flake or break. It's the most popular material - and for good reason: Stainless steel has a timeless quality that sits beautifully in a traditional or contemporary style kitchen, offering stunning good looks and a durability that helps keep it looking at its best for years.

Franke offer sinks in a selection of stainless steel finishes, so whether you prefer the more reflective qualities of the polished finish or the more subtle look of the silk or brushed finishes, which give a more matt sheen, there is a stainless steel solution for you.

Silk Brushed Polished

Ceramic

Ceramic sinks have been a popular choice for years and combine well with a variety of work surfaces such as wood, glass and granite. Ceramic sinks have a smooth, impervious surface, which is resistant to all standard household chemicals. It's a very hardwearing choice that stands up to heat, staining and impacts with ease.

White Black

Glass

Franke uses a combination of toughened safety glass and stainless steel bowls to cope with even the most demanding hard wearing environment. Perfect for that modern, aesthetic statement in the kitchen.

Black

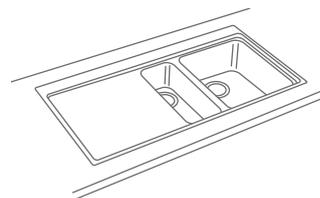

CHOOSING YOUR SINK

There are a number of considerations to take into account when choosing a sink. Not only should it accentuate the overall look and feel of your kitchen, but also there are installation and functionality options to take into account. Another vital element to consider is the way your sink physically fits into the heart of your kitchen.

Inset

This classic method of installation involves your sink being installed from above into a pre-prepared hole in your worktop. It gives you the widest range of sink shapes, sizes and styles to choose from, so you can be sure that there is an inset sink to suit your kitchen.

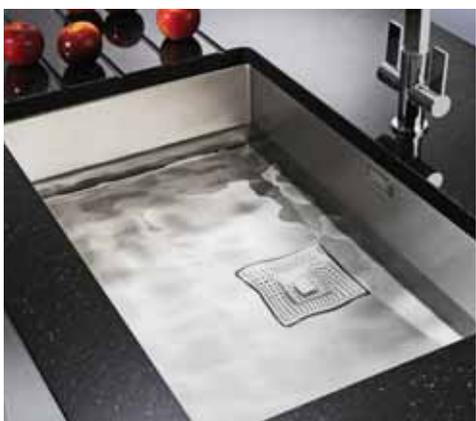

Standard rolled Profile

Swiss-edge Profile

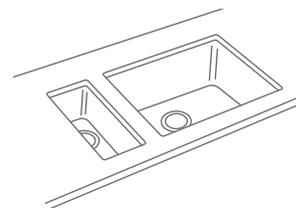

Slim-Top Profile

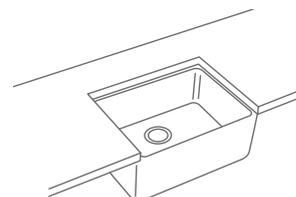

Undermount

Particularly pleasing when combined with granite, wood or solid surface worktops, undermount sinks allow for smooth, uninterrupted surfaces. Fitted underneath the work surface, it gives an edgeless finish that is easy to clean and is perfectly integrated into the kitchen environment.

Belfast

The quintessential choice for a stylish, hardworking kitchen, it's no wonder that the Belfast sink is enjoying a renaissance. They are easy to clean, resistant to stains, provide a large washing bowl area and are an ecologically friendly choice. Used either as a freestanding feature with brackets or set on top of base units, the Belfast is as charming and practical today as it's always been.

We have more detailed information on sink styles and installation advice for you at [franke.co.uk/sinkstyles](https://www.franke.co.uk/sinkstyles)

BOWL AND DRAINER CONFIGURATION

After deciding on the style and material of your preferred sink, you should also take into consideration the cabinet width, along with your preferred bowl and drainer configuration.

Bowl Configuration

One core consideration is the format of the bowls. Whether you prefer the larger area of the single bowl or the versatility offered by the 1½ bowl format, there are options to suit. See diagrams for more detailed information.

Cabinet size

Whatever the configuration, it is essential to check the cabinet size of your kitchen to ensure the sink will fit. Your sink bowl(s) is required to fit inside a single cabinet, so the cabinet size of each sink is indicated via a symbol, corresponding to the key found on the inside flap of this brochure.

Drainer Configuration

Once you have settled on a location for your sink, you can select from a number of drainer options for many styles. They include:

LHD or RHD – This describes whether the drainer on the sink is found to the left or to the right of the main bowl.

REV – These reversible designs have a tap hole at the front and back, giving you the freedom to position the sink to provide either a left or right handed drainer.

LHSB or RHSB – For sinks without a drainer but with more than one bowl, this indicates which side the small bowl is positioned.

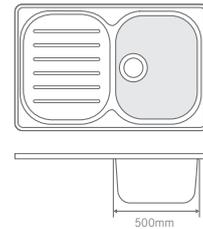

Exploring the full range

This brochure demonstrates the huge breadth of styles available in the Franke sink range, but in some ranges, there are several configurations to choose from in the same style. When this applies, you will find this symbol, which indicates the number of extra configurations available and will direct you to the sink specification section. This section provides comprehensive and detailed information on all sinks in the entire range, including all the different configurations for each particular style.

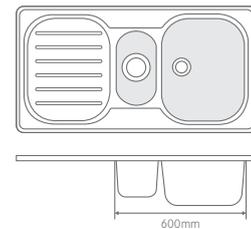

Plumbing kits

Franke Plumbing kits are designed to assist in optimising the underside of the cabinet space and in many cases provide for better utilisation of under-sink storage. Franke Siphon plumbing kits are made of rigid grey polypropylene and are the hygienic solution to a Franke sink waste system. Siphon plumbing kits have a manifold with an incline and an air vent for faster water disposal. The relevant plumbing kit is shown with each sink throughout the brochure.

TAPS WORTH TALKING ABOUT

The ever-evolving Franke tap range provides you with endless shape, line and contour possibilities and provides your kitchen with a focal point – and in some cases, a talking point.

Boiling water taps

The Minerva range provides instant boiling water at the touch of a button, turning the humble kitchen tap into the ultimate timesaving, space-saving device.

Filtered water taps

Our FilterFlow taps deliver hot, cold and filtered water in high style. There's no need to buy bottled water, and you can even do your bit for the environment.

Mixer taps

Our range spans the entire spectrum of design, from traditional bridge taps to the chic practicality of a chef's style tap. Many have features to simplify meal preparation and kitchen tasks, while taps with special features can really set your kitchen apart from the rest and completely revolutionise the way you use your kitchen.

Tap considerations

With a variety of style, size and finish options to choose from, you'll be spoilt for choice, though don't forget that the water pressure in your home will affect your decision. A plumber or retailer should be able to help you discover which pressure system you have so you can find the right tap for your needs.

INTRODUCING THE FRANKE SPECIALIST RANGE OF HOODS

The Franke range of hoods sets a new benchmark in state-of-the-art design and manufacture – building on a level of craftsmanship that has been gained through over a century of Franke experience in manufacturing kitchen products. Franke has dedicated years of research and development into producing the most advanced extraction hoods available today. The clean, contemporary styling conceals highly efficient extraction technology – powerful enough to keep the kitchen clear of steam, smoke and odours. The robust build quality and innovative features are there for all to appreciate. Every effort has been made to make this range of hoods the last word in both aesthetics and performance.

WHY EVERY KITCHEN NEEDS A FRANKE DECORATIVE HOOD

Apart from offering a design statement in the kitchen, a Franke extraction hood simply makes the kitchen a much more pleasant place.

Cooking leads to a build-up of steam and vapour within the room. This can cause wet walls and furniture and leads to all sorts of problems – from peeling wallpaper to mould spots. Kitchen units and doors can also be affected as they absorb water and begin to stick. Even cooking oils can be vapourised and leave an unsightly oily film around the cooker and units. There is also the problem with cooking smells that can spread through the house and linger. With combined kitchen and dining rooms becoming increasingly popular, the need to keep the air clear and clean becomes evident.

The powerful extraction capabilities of Franke hoods will remove virtually all steam and strong cooking odours from the kitchen. All airborne grease will also collect on the washable grease filters. Yet despite being such an efficient extractor, Franke hoods are remarkably quiet when in operation.

WASTE DISPOSAL UNITS

A choice of four units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate.

Thanks to a unique, permanent magnet motor, Franke Turbo Plus Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system. For prices and full specifications see page 67.

KITCHEN SOLUTIONS

Everything in the kitchen should flow smoothly, not just the tap. That's why we created products to make your life easier in the kitchen and that help to maintain a tidy working environment. The inset waste bin sits neatly in the countertop so food waste can be quickly and hygienically disposed of, while maintaining a minimalist look, and the Franke waste sorter range has multiple solutions to aid in the environmentally friendly disposal of waste.

ACCESSORIES AND EXTRAS

Franke accessories are specially designed to help you get the most out of your sink. We realise that many people use their sink in different ways, so these products correspond to common kitchen activities and turn your Franke sink into the ultimate multi-purpose workstation. The handy Rollamat is ideal as a drainer or for safely placing hot pans on any surface. Our Mobile Drainer provides both a cover and a drainer for your sink.

Other items aid in food preparation and dish washing and all accessories have been created to complement the outstanding beauty of your Franke sink.

Franke Rollamat

The patented Franke Rollamat is a handy accessory which can be used to drain glasses or crockery, but also doubles as a trivet to protect the work surface from hot cookware straight from the oven, hob or grill. When not in use, this innovative accessory can be rolled up and conveniently stored away.

The Rollamat can be used on any work surface and therefore with any undermount sink, but will specifically fit the drainer on certain inset sink models. Below is a guide and measurements for each Rollamat model; please check specifications before purchase.

| ROLLAMAT | COMPATIBLE SINKS | SIZE* | FUN No. | PRICE |
|-------------|--------------------|-----------|--------------|--------|
| Rollamat 30 | SNX | 298x410mm | 112.0256.867 | £64.00 |
| Rollamat 38 | MTK | 383x344mm | 112.0050.989 | £64.00 |
| Rollamat 40 | KBV, MTG, MMX, PPX | 400x400mm | 112.0050.988 | £64.00 |
| Rollamat 42 | | 468x420mm | 112.0030.882 | £64.00 |
| Rollamat 44 | PKX Undermount | 468x440mm | 112.0080.355 | £64.00 |
| Centinox | CEX (Square rods) | 315x426mm | 112.0173.411 | £72.50 |

*Rod length is the second measurement.

Waste and Overflow Solutions

All Franke Basket Strainer Wastes are manufactured from stainless steel. A stainless steel bearing is located on the stem which is designed to stop the water flow, and when left in position without sealing will act as a sieve for foodstuffs.

Some Franke sinks come with a Hygienic Overflow, which offers versatility for cleaning. Simple removal of the logo plate reveals the overflow aperture for easy, hygienic cleaning.

This year we are introducing the innovative push-button pop-up waste to the Largo workcentre and Hydros inset sinks. This feature allows you to empty the bowl without putting your hands in the sink.

To see the full range of accessories available for each sink visit franke.co.uk

COMPLETE YOUR KITCHEN DREAM WITH EASE

A sink to suit your style

To help you navigate the wide range of aesthetic, installation and functionality considerations surrounding your choice of sink, you'll have detailed information at your fingertips. Each option is explained fully over the following pages, but the handy pull-out flap gives you an at-a-glance reference guide to all the information.

Adding your perfect tap

Franke taps combine outstanding performance and stunning design to suit your taste – whatever it may be. You'll be able to quickly discover the innovative features that each tap possesses; features that are sure to get your kitchen noticed.

Our taps are designed to fit a standard 35mm tap hole (except where indicated), giving you the freedom of the entire range to find your sink's ideal partner. It is important to identify whether your home has a high or low water pressure system, as it will affect your choice of tap – your installer or kitchen retailer should be able to help.

Accessories & extras

We also have a number of stylish and innovative products that are specifically designed to enhance the aesthetic and functionality of your sink, streamlining kitchen tasks to preserve its look and longevity.

Coordinated Designer Packs

Our comprehensive range puts countless design combinations at your fingertips, so to help make your decisions easier and to make Franke quality even more accessible, we have devised Designer Packs that coordinate essential items into one stylish package. Each pack comprises a sink, a complementary tap and in some cases, matching accessories to complete the look.

If the selections in the pack are not to your taste, don't forget you have the entire range of taps and a number of clever accessories to choose from for each sink.

Full kitchen solutions

A working kitchen doesn't have to be a cluttered kitchen. Our range of clever storage and waste products help to maintain a clean and clear space for those with even the busiest lifestyles.

Hoods

With the functionality to efficiently extract cooking odours and vapours from the kitchen and the elegant style to make a design statement, browse through the full range of Franke hoods to find your perfect kitchen companion.

STAINLESS STEEL INSET SINKS

Whether you require a state of the art workcentre, a cutting edge design or a more traditional classic there is a Franke sink to suit.

All of our steel sinks are made from the finest quality chrome nickel stainless steel which is the perfect material for cleanliness and hygiene. These sinks not only

look beautiful, but are resistant to staining, chipping, rust and corrosion. With a long history as the world's premium brand in kitchen sinks, you can be confident that you are buying a quality product with premium features. In fact, we are so confident about the quality of manufacture that we offer a 50 year guarantee on all Franke sinks.

THE LARGO WORKCENTRE

The innovative Largo Workcentre sink is the most complete kitchen solution Franke have ever created. Featuring all the style and functionality of a conventional sink, but with the added convenience of two push-activated, soft-touch compartments. These can be used for storing washing-up items out of site and as an area for disposing of food waste, and are plumbed so that any excess water drains away to keep the area clean and tidy. The rear compartment is removable allowing easy movement of collected food waste.

Other features include a pop-up waste that is operated via a push-button, so that you can empty the bowl without putting your hands in the sink. Add to this accompanying accessories as standard, such as a chopping board and strainer bowl, and you'll see that the Largo is the ultimate kitchen work station.

FRAGRANITE TREATED WITH SANITIZED®

Fragranite is a durable and versatile material, which offers a whole host of aesthetic and practical benefits. The rich colour of the surface will not fade over time and won't stain or mark. As it's also heat, impact and scratch proof, it's the perfect for the busiest family homes.

What really sets Fraganite apart is its Sanitized® treatment, which reduces bacteria and microbe growth by 99%, helping to keep the whole area clean and provides long-lasting protection.

Active biocidal substance: silver ions.
The silver ion locates the bacteria via the moisture and deactivates it.

CERAMIC SINKS

Ceramic sinks have been a popular choice for years and combine well with a variety of work surfaces such as wood, glass and granite. Ceramic sinks have a smooth, impervious surface, which is resistant to all standard household chemicals. It's a very hardwearing choice that stands up to heat, staining and impact with ease.

Mythos

Mythos MTK 611 Ceramic sink & Mythos MTX Chrome tap

MTK ceramic sink measurements may vary +/-1% due to the firing process. We recommend that the sink should be used as a template in all cases.

STAINLESS STEEL UNDERMOUNT SINKS

For a flawless, uninterrupted countertop aesthetic in your kitchen, an undermount design is a perfect solution. Suitable for solid work surfaces such as granite and wood, a steel undermount sink clips directly underneath the surface to provide a work area that is elegant and hygienic.

Steel undermounts are particularly easy to clean and exceptionally durable, making it an ideal choice for those unwilling to compromise on style or performance.

CERAMIC AND GRANITE UNDERMOUNT SINKS

With no countertop lip, there is nothing to break the smooth flow of your solid granite or wood worksurface with an undermount sink.

A granite undermount sink provides a subtle complement to your kitchen design, or alternatively create a bold contrast to granite surfaces with the striking aesthetic of a ceramic sink. Either option represents a hardwearing, durable choice that looks great and works hard in your kitchen.

TIME IS PRECIOUS, MAKE THE MOST OF IT

The Minerva boiling water tap from Franke turns the humble kitchen tap into the ultimate timesaving, space-saving device. Featuring cutting-edge technology, and the very best in modern design, the Minerva delivers instant hot, cold and boiling water in a single tap to ensure it can be installed in new and existing kitchens.

Multiple patents make the Minerva a unique, convenient and safe device. Both the spout and operating handle are insulated, while a two-step safety handle provides ease of use with security as standard. The Minerva is the best-selling 3-in-1 boiling water tap on the market and more and more people are discovering that it's the one kitchen item they simply can't do without.

100°C water. No waiting

The Minerva system utilises a space-saving water tank that fits discreetly into your kitchen so that boiling water is always ready when you need it. Unlike a kettle, it only uses what is required and has a silent heating operation.

Boiling water on demand

See the Minerva boiling water tap in action at [franke.co.uk/minerva](https://www.franke.co.uk/minerva)

THE MINERVA SYSTEM

Featuring 4 different models, the Minerva boiling water system is safe, convenient and easy to maintain. Like the rest of the Franke range, there are multiple options and configurations at your disposal to fit in with your needs and your lifestyle.

A range of models to choose from

Not only does the Minerva system offer conventionally manufactured taps, but for the really discerning customer, Franke offers the Minerva Helix and Mondial models, which are crafted from solid stainless steel to complement your sink and provide an unparalleled finish.

Safety as standard

All Minerva 3-in-1 taps incorporate a 2-step safety control to avoid accidental activation. The handle is also spring-loaded so the flow of boiling water is instantaneously cut off upon release of the handle. The boiling water and mixed water are provided through completely separate channels inside the tap, ensuring the normal hot/cold function is never mixed with boiling water.

5 Litre Horizontal Heating Tank

Discreet and suitable for almost any kitchen, the horizontal water heating tank sits neatly under the standard 150mm cabinet plinth, freeing up much-needed cupboard space. This tank is supplied with all Minerva taps.

Please note: The Franke Minerva range of taps require a minimum water pressure of 1.5 bar hot and 1.5 bar cold to function correctly, please consult your plumber or installer before purchase.

FRANKE FILTERFLOW RANGE

Franke pioneered multi-tasking kitchen taps and today, our beautifully designed FilterFlow range of taps, which dispense hot, cold and filtered water, are considered the blueprint for taps that go that little bit further. Combining the considered beauty of our most stylish designs and the technologically advanced ceramic water filtration system of the Franke FilterFlow family, the products in the Franke Specialist range are the perfect addition to any modern kitchen. These desirable taps are a

stunning complement to many of the Franke sinks in the range, creating a coordinated look with effortless style. Franke FilterFlow taps deliver hot, cold and filtered water using an advanced ceramic cartridge. This water filtration system is protected by a robust stainless steel housing on all Franke FilterFlow taps where indicated, adding reassuring durability to elegant aesthetics. Or why not consider the contemporary stand-alone Franke FilterFlow Mini model, which dispenses filtered water.

Stainless Steel housing with bayonet fitting

Please note: The Franke FilterFlow range of taps require a minimum water pressure of 1 bar hot and 1 bar cold to function correctly, please consult your plumber or installer before purchase

FRANKE FILTERFLOW HAND SPRAY RANGE

All the superb benefits of Franke FilterFlow with the added feature of a separate pull-out Hand Spray, the Franke FilterFlow Hand Spray system is for kitchens that demand that little bit more.

The precision engineered taps in this range boast the full complement of features that are present in the Franke FilterFlow range – including its advanced water filtration system – but also offers an additional Pull-Out Hand Spray which is usually fitted into a solid surface worktop.

The standard length of hose for the hand spray is 1 metre, however the amount that the hose will pull out is determined by the position of the hand spray in the worktop.

The ideal hygienic kitchen solution, the spray is perfect for rinsing food as part of meal preparation and dispenses hot, cold or mixed water from the main supply. Each spray is also specifically designed to reflect the aesthetic of the particular tap that it accompanies.

Please note: The Franke FilterFlow HandSpray range of taps require a minimum water pressure of 1 bar hot and 1 bar cold to function correctly, please consult your plumber or installer before purchase.

Waste Bin

The Franke Waste Bin is an inset stainless steel system with a standard 12 litre polyethylene container. This clever feature fits flush with the worktop, allowing you to scoop in waste with ease. Replace the cover and the unit is concealed with odours safely sealed inside.

| | PRICE |
|--------------|---------|
| 134.0035.042 | £225.00 |

KITCHEN SOLUTIONS

Franke innovation doesn't end with sinks and taps. We strive to make your life easier in every aspect of your kitchen with a range of convenient and practical kitchen solutions. From dealing with unsightly household waste in a hygienic manner to effortlessly sorting waste for recycling, they are designed to save time and to incorporate kitchen essentials discreetly into kitchen units, so that you can maintain a clean, uncluttered aesthetic in your kitchen.

FRANKE WASTE SORTERS

Fitting neatly into most 500mm and 600mm cabinets Franke waste systems feature separate plastic containers to sort domestic waste into different categories such as food, cans, plastic and paper. A lid closes over the bins to contain any odours. Franke Sorters are the natural alternative to the conventional waste bin.

Soft-Close Drawer Systems

The Franke 350 Series Waste Sorters have been designed to be installed into modern soft-close drawer systems including Blum, Hettich and Grass. Sorter 350-50 and 350-60 models can only be used in conjunction with soft-close drawer systems i.e. not suitable for standard cabinets.

- Soft-close drawer system
- Accommodated in cabinet floor
- System lid with integrated charcoal filter

Standard Door Systems

The Sorter Solo 50 and Solo 60 are mounted on a standard cabinet side wall to offer a convenient waste solution, featuring a system lid with integrated charcoal filter.

The Franke 700 Series Sorter Systems are a useful addition to any kitchen with standard doors, fitting neatly into 500mm and 600mm kitchen base units. The 700 Series is available as either a foot-activated 'KickMatic' model or the easy-to-use hand-operated 'Motion' soft-close mechanism. Each bin has a handle that can also be used to secure waste bags. The roll-out carrier is fully waterproof, simple to dismantle and easy to clean.

- Standard door system

WASTE DISPOSAL UNITS

A choice of four units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate.

Thanks to a unique, permanent magnet motor, Franke Turbo Waste Disposal Units reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

*Continuous Feed models are operated by an Air Switch (or alternative) and waste food is fed through the open neck of the unit.

**Batch Feed model is activated by loading the chamber and rotating the WDU plug. Batch Feed model not compatible with ceramic sinks.

In both cases, a continuous supply of water is necessary whilst the WDU is in use. Member of REPIC for WEEE Regulations. EEE producer Registration number - WEE/DG0059TT.

An extended flange is available from service agents at extra cost if required when fitting to certain sinks.

When fitting a WDU to a single bowl model sink, it may be necessary to purchase an adaptor from the sink overflow, available from our service agents.

CHOOSING YOUR FRANKE HOOD

The kitchen hood is not simply a functional item to remove steam and odours. The right choice can enhance the whole look of a kitchen, providing a dramatic design statement or an understated complement to the overall aesthetic. As you'd expect from a Franke product, every hood in our range achieves the very highest standard of quality and technical excellence, combined with exceptional attention to detail and finish.

The range offers a true diversity of options; from ceiling, downdraft and wall mounted installation to designs particularly suited for use with an island unit. Powerful, quiet and modern in styling, they provide the optimum environment to create exceptional cooking.

Apart from the different style options, the main factor determining choice of hood is the size of the kitchen. The hood must be powerful enough to change the air in the room 10 times an hour, when in operation.

Typical kitchen volume example:

X = 4m Y = 4m Z = 2.5m

Optimum Rate of Airflow

To decide which hood to choose, first calculate the volume of the room. This figure can be arrived at by multiplying room length x width x height. So a kitchen that is 4 x 4 x 2.5 metres has a volume of 40m³. (see diagram).

This room volume figure is then further multiplied by 10 to obtain the optimum rate of airflow for that room, based on the need to change the air ten times an hour. So our kitchen of 40m³ x 10 = 400 – meaning it would require an extraction rate of 400m³/h for efficient ventilation of the room. For optimum extraction capability ensure that the hood width is equivalent or greater than the width of your hob.

INSTALLATION TYPES

Ceiling Hoods

As the name suggests, the hood is installed directly into the ceiling and represents an understated choice, which can lend a more open feel to a kitchen.

Island Hoods

In larger kitchens boasting an island cooking area, an island hood is the perfect complement to create a focal point to the space.

Wall Mounted Hoods

Venting directly out of the wall, or set to recirculating mode, wall mounted hoods offer a wide range of styles to suit your individual kitchen, each with innovative features and a premium finish.

Downdraft Hood

For those wishing to make a real design statement, or just looking for something a little different, look no further than a downdraft hood. Featuring cutting-edge technology, the hood provides powerful yet quiet extraction when needed, then subtly retracts directly into the kitchen worktop at the touch of a button when not in use.

HOODS FEATURES AND BENEFITS IN DETAIL

Each hood in the Franke range has a unique set of features designed to make your life easier and make the cooking experience more enjoyable. Here you can discover which hood is just right for you.

Sound Insulation

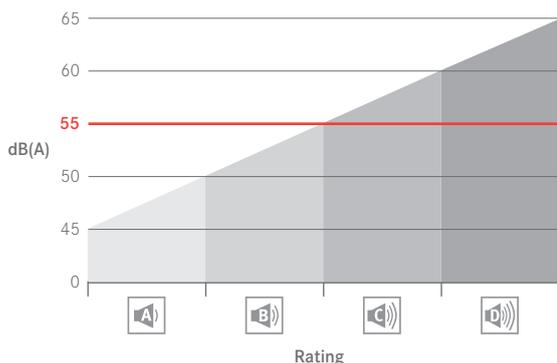

To assist in your choice of Franke hood we have used symbols as a guide to the relative noise level you may expect in a typical sized kitchen, where an optimum noise level of 55 decibels is ideal.

Effective sound insulation is important in ensuring a calm, welcoming kitchen environment. Whether it's sound dampening comfort panels in perimetric units or the silent kit cushions inside the central unit of other extractors, you can be sure of unrivalled noise reduction performance in all Franke hoods.

Hood Decibel Rating (db(A) at 400m³/h)

Washable Filters

All of the filters in Franke hoods are washable which extends their life-span and preserves their efficiency. The filters can be conveniently removed and require no special cleaning products to get them back in pristine condition. Just put them in the dishwasher.

Filtering Function

Where a Franke hood is installed in an environment where no external flue is available, fumes can be managed by recycling the air going into the unit. These models utilise the latest charcoal filters to trap undesired odours.

Control Types

Franke hoods offer a variety of technologically advanced control systems that combine ease of use with striking aesthetics. The various units possess either functional push button, electronic, or the sleek smooth look of a touch control system. Even a remote control is an option on some models.

Push button

Push button

Electronic

Touch control

Ghost controls

Extraction Speed Settings

All Franke hoods come fully equipped with a variety of speed settings, ranging from 3 up to an 8 speed model. Some units also include an intense setting, for short, powerful bursts to remove unpleasant odours as quickly as possible.

Automatic Cut Off Timer

Large, modern kitchens combined with the reduced noise of Franke hoods make it easy to forget that the hood is running. To put your mind at rest, we equip our products with an automatic cut off timer. This feature is also extremely useful for those who wish to leave the extractor running for a short while after leaving the kitchen to remove any lingering smells.

Continuous 24 hour Ventilation

Keep your kitchen feeling fresh and clear of unwanted odours with the 24 hour ventilation function which provides a constant flow of clean air running through the room at various intervals.

Perimetric Extraction

Perimeter method extraction offers superior levels of efficiency, with air flowing around the edges of the hood panels. Based on the principles of the Venturi effect, air accelerates as it passes through the constricted space, then decreases immediately as it enters the hood, providing terrific extraction without requiring added pressure.

Digital Display

Utilising the latest in digital technology, Franke offer simple and versatile controls for the hood. Attractively illuminated digital displays are features of some of the more advanced electronic and touch controlled units.

Charcoal Filters

Required on all recycling hood units, charcoal filters are used to catch unwanted odours and are supplied in either circular or square format, depending on the model. Please check models for configuration.

Types of Motor

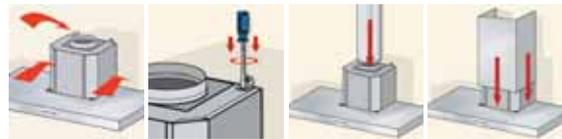

Whether it's the excellent Brushless (BL), the high performance ENERGY or the unbeatable quiet and efficient PRO+ Motor, you can always expect quality, reliability and superb power from your Franke hood.

Comfort Light

Reduced hood light intensity at the touch of a button, giving a more subdued ambient light in the kitchen area. Thanks to its low level of energy consumption, the comfort light can be left on for long periods of time.

Easy-Fit System

With the innovative easy-fit system, installing a hood becomes a simple task. The hood slides right into the centrally mounted core, giving superb accessibility for maintenance, plus the ability to clean quickly and easily without the need for technical assistance.

Filter Saturation Indicator

Ensuring that a Franke hood is always operating at its optimum performance level is simple with a function that indicates when the filters require maintenance. The metal filters on Franke hoods can be easily cleaned in a dishwasher, whilst the indicator also notifies when to replace charcoal filters when fitted.

Remote Control

Some Franke hoods offer the option of remote control operation, for the ultimate in technological luxury in the kitchen.

£44.00 (Inc. VAT) 112.0174.991
Requires 2 x AAA Batteries
(not included)

THE GALAXY CEILING HOOD RANGE

Increasingly the kitchen is becoming the centre piece of the home, so more and more the need for efficient extraction is becoming a prime requirement.

Galaxy Hoods are unobtrusive and efficiently provide all the extraction capabilities required. Two models are available to suit most requirements and typical examples of installation are provided on page 81.

Both models are supplied with a remote control.

Galaxy/3 Energy FX 1000 WM

WM = Without Motor
(Separate remote motor)

Price shown is inclusive of separate motor and frame.
The motor is provided separately and must be installed
at a distance between 3 and 6 metres from the hood.
See page 81 for installation examples.

THE ISLAND HOODS RANGE

An island hood makes a statement. The perfect complement to an island unit hob, it is a design feature that becomes a kitchen focus. Installed from the ceiling, island hoods look great from all aspects.

The Franke range includes the cylindrical Tube Island and the geometric Glass Linear Island models, both of which have a host of features and offer excellent extraction performance, as you would expect from a Franke product.

DOWNDRAFT HOOD

For those who want the ultimate in minimalist design the Franke Downdraft Hood is the perfect option. The hood is positioned behind the hob and rises from the worktop at the touch of a button. The downdraft hood is an extremely attractive feature in any kitchen yet allows for an unobtrusive, subtle kitchen style.

The motor for the Downdraft hood is situated in the cabinet underneath the hob which can be vented through an external wall, or set-up in re-circulatory mode.

GALAXY CEILING HOODS INSTALLATION SUGGESTIONS FOR REMOTE MOTOR*

The motor can be fitted remotely in a number of different options, some of which are shown below.

EXAMPLE 1

Offset motor exit by the wall.

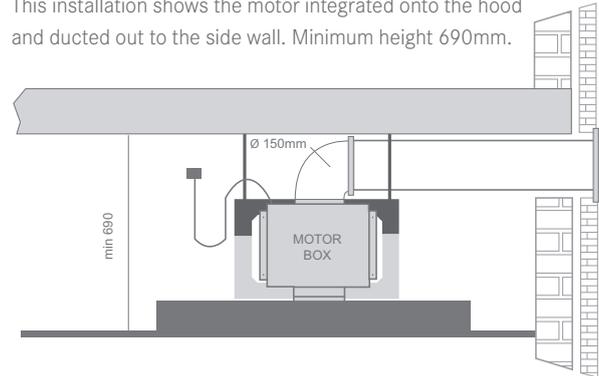

This example is for when the motor is situated away from the exterior wall. Minimum height 400mm.

EXAMPLE 2

Integrated motor exit by the wall.

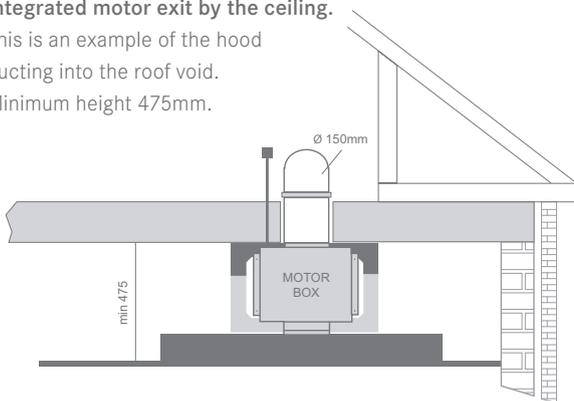

This installation shows the motor integrated onto the hood and ducted out to the side wall. Minimum height 690mm.

EXAMPLE 3

Integrated motor exit by the ceiling.

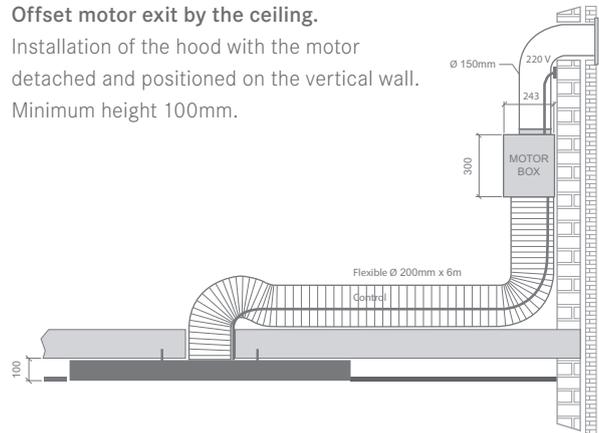

This is an example of the hood ducting into the roof void. Minimum height 475mm.

EXAMPLE 4

Offset motor exit by the ceiling.

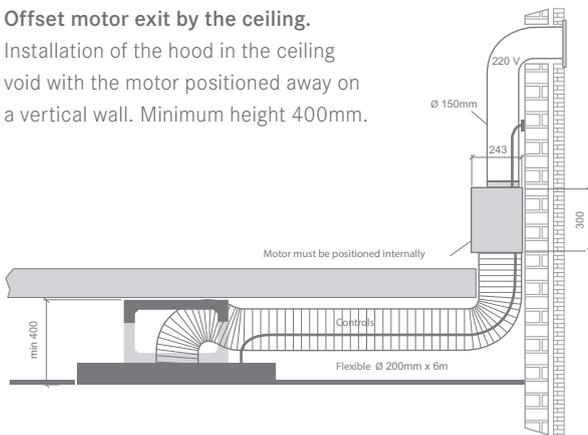

Installation of the hood with the motor detached and positioned on the vertical wall. Minimum height 100mm.

EXAMPLE 5

Offset motor exit by the ceiling.

Installation of the hood in the ceiling void with the motor positioned away on a vertical wall. Minimum height 400mm.

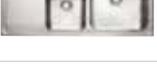

*Ducting not included

KITCHEN
SYSTEMS

Colours shown are for reference only. All sinks available with left or right hand drainer. The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required e.g. MMX 251 left hand drainer or MMX 251 right hand drainer. All bowls sizes and dimensions are described in mm.

Franke sinks are guaranteed against manufacturing defect for 50 years. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings and finishes (5 years for Portfolio 55 Collection), and 5 years in relation to moving parts. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights.

Franke hoods carry a 2 year warranty against material and manufacturing defects. The warranty will be valid from the date of purchase as shown on the sales invoice. Please keep the invoice for your records. This is a domestic appliance only. The warranty will only be validated when it is used in a domestic environment.

Prices shown are UK mainland prices effective from 1st March 2014 and include VAT at the current rate of 20%. This literature has been produced on chlorine free materials harvested from sustainable forests. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. E & OE.

Member of REPIC for WEEE Regulations. EEE Producer Registration Number - WEE/DG0059TT.

Front cover shows Hydros HDX 654 and Bern Chrome tap.
