Fisher&Paykel

A HISTORY OF INNOVATION

Since our founding in 1934, we have grown into a global, design-led company of more than 3,000 people. Designed and engineered in New Zealand, our products are sold in 50 countries around the world. Our design heritage is founded on a pioneering spirit and a culture of curiosity that has challenged conventional appliance design to consistently deliver products tailored to human needs. For us, legacy is about looking into the future, while ensuring what we develop today is aligned to the fundamental principles of sustainable design. We are committed to ongoing research and development. Our culture is one of open innovation, which allows people to work collaboratively to find insights and ideas that connect with our customers and respect our planet.

A black and white photograph of a beach scene. The foreground shows the wet sand of a beach, with gentle waves lapping at the shore. The middle ground features a line of waves breaking further out. The background is dominated by a vast, cloudy sky. The text "We live one day at a time." is centered in the middle of the image.

We live one day at a time.

Cooking
eating

playing
relaxing.

**And then doing it all over again.
Day in, day out.**

TURNING ROUTINES INTO EXPERIENCES

Behind every product is a story and that story starts with you. Your home is an expression of who you are and how you live. Our passion is creating better products that turn everyday routines into enjoyable experiences. We understand the dynamic nature of modern living. We deliver products that are adaptable, functional and durable, as well as human. We don't just make things that fit the space provided, we create products that fit the lives lived around them. Live life — we'll take care of the details.

THE SOCIAL KITCHEN

The kitchen is the humble engine room in which we choose to live—where we create, socialise and enjoy the best that life has to offer. Cooking is a social activity. We generally place the key appliances in what we consider to be logical places: the work triangle of hob, sink and fridge. But we no longer cook in straight lines. We don't cook on conveyor belts. Sometimes we assemble, sometimes we bake, sometimes we stir-fry and sometimes we boil. We don't cook the same way every day: we can be a weekday cook and a weekend gourmet. The work triangle limits our creativity. It's not just about efficiency; sometimes it's about fun. Too many cooks may spoil the broth or they may create a wonderful, social and enjoyable meal. Let's reclaim the kitchen. Let's live outside the triangle.

DESIGNED FOR REAL LIFE

At Fisher & Paykel, we are curious about people—how they live, where they live, what they do and how they use things. This is where hidden insights wait to be uncovered. We are curious about not only the function and performance of our products, but also the emotional role they play in people’s lives. For us, design is not a self-serving goal—it is a human endeavour to make life a little bit better.

COOK TO CREATE

We see cooking not as a chore, but a creative act. As more of our lives become virtual and people look for ways to make and create things, we design high-performance tools you can rely on and be creative with, that turn everyday meals into creations. Fisher & Paykel products cater for different patterns of use—whether it's mid week convenience or weekend gourmet, heat and eat or a family feast. We understand everyday life and support the lives lived around our products. Cooking is part of our DNA—one part designer, one part chef. We have a passion for food and we are just as interested in making high-performance ovens that perfect your favourite foods as making the process of cooking more enjoyable. Our insights come from real-world use and then the results are tested in our lab daily, with the aim of inventing technologies that deliver the perfect cooking result.

BUILT-IN OVENS

Fisher & Paykel's multifunction Built-in Ovens are designed to perfect your favourite food, with a full range of cooking modes and temperatures providing greater control and more flexibility; and with a selection of generous oven sizes to meet the needs of the most demanding cook. Roasting is an art as well as a science. The difference between rare and medium takes timing, intuition and a well-trained eye. Fisher & Paykel's Built-in Ovens are programmed to quickly heat to a high temperature, browning the meat to create delicious savoury flavours before automatically lowering the temperature to deliver a perfect, tender roast every time. Our ovens are easy to clean with some models offering pyrolytic self-cleaning or catalytic liners that break down oil and fat splashes during normal cooking. Most offer CoolTouch doors with multiple panes of glass and advanced cooling systems ensure the external surfaces remain safe to the touch.

60CM BUILT-IN OVEN

Welcome to the next generation in Fisher & Paykel Built-in Ovens. Designed specifically for diverse cooking styles, with generous capacity, high performance and a full range of oven functions including the new vent bake – which offers the ability to control the removal of moisture from the baking or roasting environment for optimum cooking results. An oven’s performance can’t be measured by a single stand-alone feature and our Built-in Ovens offer a full package of features and functions to deliver optimum results for both cooking and cleaning up afterwards. Built for cooking performance, an intuitive control system allows for precise cooking-mode selection every time. These ovens have generous internal capacity, fitting 30 percent more than most traditional European ovens and most clean up after themselves with a pyrolytic self-cleaning function (OB60SL11 models only). The sleek lines and design detail mean they are ideally suited to fit with the rest of Fisher & Paykel’s coordinated kitchen family, from Hobs to ActiveSmart™ fridges, DishDrawer™ dishwashers and CoolDrawer™ multi-temperature drawers.

60cm Built-in Oven Features

1 ActiveVent System

Food is perfectly cooked with the lowest possible amount of energy using the ActiveVent system, unique to the 60cm Built-in Oven series (excludes OB60SL7 models). The active venting system and up to 11 oven functions optimise the balance between excellent cooking performance, condensation management and energy consumption. Full temperature is reached quickly with a rapid heat-up feature and a powerful grill (up to 3200W) that gives you an even and quick result, perfect for browning and caramelising.

2 Large Oven

Sized to fit the food you cook, Fisher & Paykel have one of the largest 60cm Built-in Ovens on the market, providing 90L total and 77L of usable capacity*. The maximised height means you're able to fit a large casserole dish, the family roast and even a pie as well—true multi-shelf cooking. Two shelves can be fully utilised at the same time without hot spots or uneven browning. A 5.5kg turkey (or other cut of meat) can be deliciously cooked using the optional rotisserie kit (OB60SL11 & OB60SL9 models).

3 Elegant Design

All of the three models in our Built-in Oven series are finished in black reflective glass and stainless steel that blends elegant, minimalist aesthetic with design for durability. The finishes and handles match the rest of Fisher & Paykel's coordinated kitchen family, from Hobs to ActiveSmart™ fridges, CoolDrawer™ multi-temperature drawers and DishDrawer™ dishwashers.

*Measured to EN 50304:2009+A1:2012 and EN 60350:2009+A1:2010

4 Pyrolytic Self-cleaning

No need for harsh chemical cleaners in our pyrolytic self-cleaning ovens† as food residues inside the oven walls are naturally broken down at a very high temperature, leaving only a light ash that can be removed with a damp cloth. The non-pyrolytic OB60SL9 model has catalytic liners that break down oil and fat splashes during normal cooking. A unique clipping system for side racks and a simple glass mounting system for the oven door mean quick and easy removal and replacement when cleaning.

5 Pre-set Oven Functions

The series features three models with either 11, nine or seven oven functions that include: Bake, Vent Bake, Fan Bake, Classic Bake, Pastry Bake, Fan Forced, Roast, Grill, Fan Grill, Rotisserie, Warm and Self-clean. On the 11 and 9 function models there is no need to program the functions, as these are pre-set at the touch of a dial to deliver just what you need to cook each dish to perfection.

6 Safety Features

The 60cm Built-in Oven features a beautifully balanced, lighter and less bulky CoolTouch door* for safety. An exceptional cooling system allows for a three-pane glass door rather than heavier four panes, while still achieving CoolTouch status to ensure it's safe to touch externally. Sliding hot oven dishes all the way out of the oven is made safe with full extension shelves (optional on OB60SL7 models). These are designed to integrate with the shelf for quick and easy removal and adjustment. (*Excludes OB60SL11DCPX1).

7 Accessories

The rotisserie kit option (9 and 11 function models only) has a 5.5kg capacity and ensures delicious roasts are browned evenly as the surface is continuously basted. Prepare the meat on the spit and rotisserie dish, then simply slide it into the oven. To achieve the perfect internal temperature, the meat probe will detect the temperature at the centre of the meat and show it on the control panel (OB60SL11 only). Crafted from heavy-gauge enamelled steel, the three-piece dish system includes a deep roasting dish, splatter tray and grill rack (model dependent.)

† Pyrolytic function not available for OB60SL9 or OB60SL7 models

reddot design award
winner 2013

60cm Built-in Oven

Built for performance, an intuitive control system allows for precise cooking-mode selection. Generous internal capacity fits 30 percent more than most traditional European ovens and offers a pyrolytic self-cleaning function*.

1 Perfect Results

Using the unique ActiveVent™ system† and up to 11 oven functions, you can optimise cooking performance, condensation management and energy consumption.

2 Sized to Suit

This is one of the largest 60cm Built-in Ovens on the market, providing 90L total and 77L of usable capacity (OB60SL models only).

3 Designed to Match

Our Built-in Oven series is finished in black reflective glass and stainless steel, matching the rest of Fisher & Paykel's coordinated kitchen family.

4 Easy Cleaning

No need for harsh chemical cleaners in our pyrolytic self-cleaning ovens. The non-pyrolytic OB60SL9 model has catalytic liners that break down oil and fat splashes.

5 Precise Control

Oven functions are pre-set at the touch of a dial while brilliant lighting and a large viewing window reduce the need to open the oven door.

6 Safe and Sound

A clever cooling system allows for a lighter three-pane glass door‡, while still achieving CoolTouch status.

7 Accessories

These ovens come with a heavy-gauge enamelled steel dish system with deep roasting dish, splatter tray and grill rack. The OB60SL11 comes with a meat probe for automatic cooking functions. A rotisserie kit is an optional extra for the OB60SL9 and OB60SL11 only.

* Pyrolytic function not available for OB60SL9 or OB60SL7 models

† Nine and 11 function models only

‡ Excludes OB60SL11DCPX model

ACTIVE VENTING

An oven's performance can't be measured by temperature and heat alone—moisture is a vitally important but often neglected factor in the cooking performance of your oven. If your oven holds too much moisture or too little, your gastronomic creation can quickly turn to disaster. That's why the Fisher & Paykel 9 and 11 function Built-in Ovens feature the unique ActiveVent system as well as a full package of features and functions (OB60SL11 only). Fisher & Paykel's ActiveVent system allows you to control the removal or retention of moisture from the baking or roasting environment to optimise both cooking results and energy consumption.

60cm Tower Built-in Oven

The Tower Oven delivers outstanding performance and innovative cooking features that make entertaining for small or large groups effortless. This visually impressive oven is finished in black reflective glass and stainless steel, blending minimalist design with durability.

1 Perfect Results

Food is perfectly cooked in either or both of the two ovens, each with eight oven functions including Fan Grill and the Fan Bake Convection cooking system that provides even heat distribution for multi-shelf cooking. Each oven has a powerful 3000W grill that gives you an even and fast result.

2 Sized to Suit

Entertaining for small or large groups is effortless with these two matching 60cm wide ovens.

3 Designed to Match

All of the models in our Built-in Oven series are finished in black reflective glass and stainless steel, to match the Fisher & Paykel coordinated kitchen family.

4 Easy Cleaning

Catalytic self-cleaning liners in both ovens break down oil and fat splashes. Not only can the oven doors be easily removed, but so can the glass — making cleaning simple.

5 Precise Control

Six shelf positions give you a range of options for organising the inside of the oven. Large windows reduce the need to open the oven door, providing the ultimate cooking result and improving energy efficiency.

6 Safe and Sound

Easy-glide telescopic oven runners slide in and out effortlessly. Each oven features a CoolTouch door with three panes of glass and its own cooling system.

60cm Under Counter Oven

Fisher & Paykel ovens are designed with simply perfect cooking in mind. The Double Under Counter Oven gives you the flexibility to prepare different dishes simultaneously in two different cavities, while the classic styling and quality materials achieve durability with a timeless look.

1 Sized to Suit

Entertaining for small or large groups is effortless with these two matching ovens that can fit under the counter.

2 Perfect Results

Food is perfectly cooked in either or both of the two ovens.

3 Designed to Match

Finished in black reflective glass and stainless steel that blends elegant, minimalist aesthetic with design for durability, this oven matches the rest of Fisher & Paykel's coordinated kitchen family.

4 Easy Clean

Catalytic self-cleaning liners in the main oven break down oil and fat splashes during normal cooking and the door and the glass itself can be removed for easy cleaning.

5 Precise Control

The electronic clock offers automatic cooking control along with essential oven functions and gives the user complete control of their cooking to ensure optimal results.

6 Safe and Sound

Easy-glide telescopic oven runners slide in and out effortlessly, presenting your food to you and saving you from reaching in. Four shelf positions give you a range of options for organising the interior of the oven. This double oven has A energy ratings and each oven has a door and cavity cooling system.

KITCHEN COMPANION PRODUCTS

Whether it's a fresh coffee in the morning, a healthy steamed lunch or a quick ready-made meal in the evening, the Kitchen Companion Product Series takes convenience to a new level. The series includes a Coffee Maker, Steam Oven, Compact Oven, Combination Microwave Oven and Warming Drawer, offering a complete modular family designed to complement any kitchen. Temperature pre-selection and an oven programmer mean that cooking times can be pre-set across the product family, so multiple dishes can be easily coordinated. Each product is based on standard dimensions and can be easily configured to suit your preference—whether it's stacked vertically, placed side-by-side in a linear fashion or configured in a two-by-two block. Any combination will deliver a unified built-in solution. Design features include capacitive touch controls and standard fascia height with black reflective glass and polished metal trim matching the broader Fisher & Paykel series including Hobs, ActiveSmart™ fridges, CoolDrawer™ multi-temperature drawers and DishDrawer™ dishwashers to create an integrated look throughout your kitchen.

DESIGN FLEXIBILITY

Perfect modularity means Fisher & Paykel's kitchen companion products can be positioned for maximum functionality—whether in a compact block, a vertical stack or side-by-side in a linear set. Beautifully finessed design features matched with the optional trim kit allow the kitchen companion series to fit the popular 48cm kitchen module height.

Compact Oven

Space — sometimes there just isn't enough of it. Enter the Fisher & Paykel Compact Oven, the little oven that thinks big, with design detail ideally suited to fit with other Fisher & Paykel built-in appliances, both large and small.

1 Perfect Results

The Compact Oven delivers the superior performance and full functionality of a large model with a choice of eight multi-function programs, temperature pre-selection and an oven programmer.

2 Sized to Suit

A compact 46cm height means this oven can be placed virtually anywhere. All companion products can be installed at a convenient height to suit your kitchen design and preference.

3 Designed to Match

Finished in black reflective glass and polished metal, these elegant, yet durable compact ovens match the other companion products and the larger coordinated kitchen family.

4 Easy Cleaning

The Compact Oven has an easy-clean enamel interior with a catalysing filter that removes odours while you cook. The oven door has removable glass panes for effortless cleaning.

5 Precise Control

All the information you need at a glance is on the intuitive display, including a recipe menu and digital temperature control for absolute accuracy. Capacitive touch controls and an electronic touch panel make this oven very easy to use.

6 Safe and Sound

The compact oven has a well-balanced, three-pane glass, CoolTouch oven door along with a childproof key lock for extra safety. CoolTouch doors help keep the heat inside the oven, keep the kitchen cooler and make the kitchen safer for little hands.

Fisher & Paykel

Steam Oven

This Steam Oven provides appetising and healthier alternatives to fried and baked food. Steam cooking is one of the easiest yet oldest forms of cooking and can be used for almost any food. Heat from steam diffuses through food allowing it to cook in its own juices, retaining valuable nutrients, minerals and vitamins and—most importantly—flavour. The Steam Oven adds a new dimension to oven-based cooking.

1 Perfect Results

The Fisher & Paykel Steam Oven allows for healthy and easy cooking—keeping food moist and fresh with no oil, smoke or mess. The oven heats up quickly and cooks most meals in 30 minutes or less.

2 Sized to Suit

At 46cm high, this 29L built-in Steam Oven can be placed virtually anywhere, fitting perfectly with other products in the kitchen companion series. An optional 2cm trim kit ensures a perfect match with the full series of 60cm built-in kitchen products.

3 Designed to Match

All of our kitchen companion products are finished in black reflective glass with polished metal trim that blends elegance with durability.

4 Easy Cleaning

Cleaning and care of the Steam Oven is simple. After each use, simply clean the smooth stainless steel interior with a dry cloth after the steam generator has cooled.

5 Precise Control

The oven beeps when the food is ready and the intuitive display provides all the information you need, including cooking function selection, time and when to refill. A removable one litre water reservoir is used to generate steam that lasts almost an hour. An alarm sounds when it's empty and it's simple to refill.

6 Safe and Sound

The Steam Oven comes with a childproof key lock for extra safety.

Combination Microwave Oven

Fast cooking is the primary advantage of the built-in Combination Microwave Oven. This oven merges the traditional crisping and browning benefits of the convection oven with the speed of a microwave, and 10 different oven modes including Reheat, Defrost, Bake and Grill.

1 Perfect Results

Forget soggy defrosted foods or uneven heating. This oven incorporates the best of convection and microwave technology and eliminates the need for two separate appliances, with a choice of 10 oven modes combined with a powerful 1000W microwave offering 19 power levels.

2 Sized to Suit

A compact 46cm height means this Combination Microwave Oven can be placed virtually anywhere at a height to suit you. An optional 2cm trim kit ensures a perfect match with the full series of 60cm built-in kitchen products.

3 Designed to Match

All of our kitchen companion products are finished in black reflective glass and polished metal that blend an elegant, minimalist aesthetic with design for durability.

4 Easy Cleaning

The smooth enamel interior with glass inner door and removable side racks, along with a turntable, make cleaning easy.

5 Precise Control

All the information you need at a glance is shown on the intuitive display, including a cooking guide with 12 pre-selected automatic cooking modes.

6 Safe and Sound

The Combination Microwave Oven has a childproof key lock for extra safety.

19:30

Fisher & Paykel

100% PURE

Fisher & Paykel

Coffee Maker

Like having a barista in your kitchen, the built-in Coffee Maker is designed to make coffee just the way you like it. Offering adjustable coffee strength and temperature, multiple coffee cup sizes and 15-bar pressure at the touch of a button, it's the perfect way to start each day.

1 Perfect Results

Easily adjusted to suit your preference, this Coffee Maker also provides automatic descaling and cleaning for perfect coffee, every time.

2 Sized to Suit

The adjustable coffee dispenser holds 200g of coffee and the conveniently positioned steam milk frother avoids unnecessary detachable milk containers.

3 Designed to Match

Finished in black reflective glass and polished metal, the Coffee Maker matches the rest of the Fisher & Paykel coordinated kitchen family.

4 Easy Cleaning

The Coffee Maker has a self-cleaning function and comes with a removable drip tray and a bin for used coffee grounds.

5 Precise Control

The intuitive electronic touch panel display includes refill, cleaning and maintenance data, plus a program to memorise your favourite coffee recipe. Twin LED lights ensure you see what you are doing on those dark mornings.

6 Safe and Sound

The unit glides out on telescopic slides to easily add coffee beans and the adjustable shut-off timer switches the machine off after a set period or when you have made your last coffee. The on/off switch is conveniently hidden for children's safety.

7 Accessories

These comprise: coffee dispenser spoon; descaling solution; and optional lower trim kit.

Warming Drawer

Putting the finishing touch to a delicious meal or coffee, the Warming Drawer keeps plates and cups warm. It's designed to fit under 48cm or 60cm high appliances and can be installed in many combinations—under the bench or built into the wall. It's also strong enough to support the weight of other products such as an oven or coffee maker.

1 Perfect Results

A separate Warming Drawer allows you to warm plates while you finish cooking. The temperature control settings (45°, 55° and 65°C) and even heat distribution within the Warming Drawer means no hot spots. Two timer settings can maintain a temperature for a set time or it can be left on for up to 12 hours.

2 Sized to Suit

Designed to fit under 48cm and 60cm ovens and other kitchen appliances, the Warming Drawer can be installed with or without other appliances under-bench or built into the wall at a convenient height.

3 Designed to Match

Finished in black reflective glass or stainless steel, the Warming Drawer matches the other Fisher & Paykel kitchen companion products and the larger coordinated kitchen family.

4 Easy Cleaning

The front panel and smooth-glass base of the Warming Drawer are easy to wipe clean.

5 Precise Control

All the information you need at a glance is shown on the illuminated touch display, including temperature settings and shut-off timer.

6 Safe and Sound

Full extension slides make it safe to remove hot crockery with minimal obstructions and, as an extra safety measure, the drawer turns itself off after 12 hours of continuous use.

Fisher & Paykel

HOBS

So many things to consider when selecting a hob: a look to match your kitchen, a size to fit your space and a fuel type to suit your cooking style. It all comes down to personality and preference. Whether it's the performance and theatre of live flame, the precision, control and sleek simplicity of induction, or the straightforward power of an electric hob, Fisher & Paykel's Hob family is designed to provide a full range of solutions. Whatever your choice, there are many configurations and sizes to suit any cooking style. Each product has been designed to deliver great performance—from searing heat to the gentlest of simmers—and all are designed for easy cleaning and with safety in mind.

Gas on Glass Hobs

The Gas on Glass series combines the cleanability of the highest-quality glass surface with the efficiency of gas cooking. It delivers total cooking precision through the latest burner technology and elegant stainless steel controls. The Gas on Glass series is a modular family of appliances designed using premium quality materials with a polished metal trim.

1 Perfect Results

Our award-winning Gas on Glass Hobs come equipped with powerful burners; the wok burner has a uniform flame for even heat distribution while the auxiliary burner has the added capability of exceptionally low temperatures – ideal for delicate sauces.

2 Sized to Suit

A range of different sized burners can be used together: 90cm five-burner; 90cm three-burner; 60cm four-burner; 60cm three-burner; 45cm one-burner; 30cm two-burner. The 45cm single wok burner comfortably takes a large wok and is among the most powerful on the market.

3 Designed to Match

The black reflective glass, brushed stainless steel and polished metal trim blend elegance with durability to match the rest of our coordinated kitchen family.

4 Easy Cleaning

The easy-to-clean hob design means you can simply remove the trivets, wipe and walk away.

5 Precise Control

It delivers total cooking precision through the latest burner technology and elegant stainless steel controls.

6 Safe and Sound

The flame failure safety device means that if the flame is accidentally extinguished the gas automatically turns off. We only use ecofriendly ceramic glass without any arsenic or heavy metals used in the manufacturing process.

Available late 2014

red dot design award
winner 2013

Gas on Steel Hobs

The Gas on Steel Hobs come in different sizes and offer power levels for everything from a slow simmer for sauces, to an intense heat for steaks and stir-fries. Combining the attractiveness of sleek stainless steel with the durability of cast iron trivets, these hobs support the most avid chef.

1 Perfect Results

The Gas on Steel Hob perfects the slow simmer for sauces to the intense heat needed for steaks and stir-fries, with five different strength burners including some of the most powerful available.

2 Sized to Suit

With up to five burners, including simmer, rapid and up to two wok burners, the Gas on Steel Hobs provide great cooking flexibility.

3 Designed to Match

The brushed stainless steel blends elegance with durability—matching the rest of our coordinated kitchen family.

4 Easy Cleaning

These hobs are designed as a singular piece of steel with quick component removal for easy cleaning. Durable and easy to clean, cast iron trivets provide a safe and stable cooking surface. The rubber feet (excludes CG905DWACX1) ensure that the hob is not scratched when the trivets are placed onto the hob.

5 Precise Control

Innovalve™ technology allows you to adjust the flame with unprecedented 180 degree gas valve rotation (CG905DWACX1 only). Most hobs offer only 70 degree rotation. For accurate temperature control, ergonomic dials on the side of the hob automatically ignite the flame quickly and safely.

6 Safe and Sound

Indicator lights show which burners are in use and alert you if the gas shuts down (CG905DWACX1 only). The flame failure safety device means that if the flame is accidentally extinguished the gas automatically turns off. All Fisher & Paykel Gas Hobs feature electronic ignition ensuring they are quick, reliable and safe.

Available late 2014

Touch&Slide Induction Hobs

Traditionally we cook by generating heat from one source, such as a flame, and conducting it to another. Fisher & Paykel Induction Hobs work on a different principle. The hob itself produces electromagnetic vibrations, which induce the pot or pan to generate its own heat, resulting in shorter heat-up times and a safer cooking surface.

1 Perfect Results

The PowerBoost function delivers instant, intense heat when you need it and the GentleHeat function produces slow, continuous simmering.

2 Sized to Suit

Select from 90cm five zone; 60cm four zone; and 30cm two zone; to suit all sizes of cookware. The hobs are perfectly flat so the surface can be used as an extension of your preparation area.

3 Designed to Match

Induction cooking is popular with those who love visual simplicity and clean, smooth lines. Finished in black glass, you get elegant design with durability.

4 Easy Cleaning

The flat surface is easy to clean because there are no obstructions and because Induction heats just the pot rather than the surrounding glass, the likelihood of burned spill overs is greatly reduced.

5 Precise Control

Induction cooking delivers an immediate response with greater energy efficiency than that of either gas or electric. Touch&Slide soft-touch controls are simple to use and provide great precision.

6 Safe and Sound

This hob will alert you if it's turned on without a pot or pan on it, and will switch off if you don't respond. It will switch off if the pan being used isn't suitable for induction cooking and a key lock is provided for extra safety. We use ecofriendly ceramic glass in the production of our Induction Hobs without any arsenic or heavy metals used in the manufacturing process.

Available 2014

Ceramic Hobs

1 Perfect Results

Solid performers with superb simmer results, our Ceramic Hobs allow you to move pots and pans around simply and quickly while high-speed ribbon elements provide good temperature control from a rapid boil to an extremely low simmer.

2 Sized to Suit

Four size variations and either two, four or five element configurations are available. Because our Ceramic Hobs are perfectly flat and cool down quickly when switched off, the surface can be used as an extra preparation area.

3 Designed to Match

Designed using premium quality materials, the finishes and controls match the rest of our coordinated kitchen family.

4 Easy Cleaning

The flat surface makes our Ceramic Hobs very easy to clean. Ceramic glass is very strong, adding to the durability and performance of the hob.

5 Precise Control

You have the choice of classic dial controls or the perfectly flat Touch&Slide functionality. The intelligent timer on touch-control models lets you activate any combination of elements, or you can simply use it as a minute minder.

6 Safe and Sound

Hot surface indicators glow until the surface is safe to touch and the Touch&Slide Ceramic Hob will turn off if something spills over the controls. We use ecofriendly ceramic glass in our Hobs, without any arsenic or heavy metals used in the manufacturing process.

RANGE COOKERS

Fisher & Paykel's Range Cookers are the showpiece of the kitchen and deliver outstanding performance. These are the domestic version of the professional chef's cooker. With a commanding presence they not only look like they've come from a restaurant kitchen but also deliver similarly high performance. There are up to eight oven functions in the electric oven ranging from Defrost to Fan Bake including Rotisserie in some models and a powerful grill element — perfect for any culinary requirements.

90cm Range Cooker – Gas

This Range Cooker gives you the flexibility to prepare several courses simultaneously. With a large electric oven combined with a five-burner gas cooktop, the clean lines in black reflective glass and stainless steel complement the style and elegance of any kitchen.

1 Perfect Results

Eight oven functions from Fan Grill to traditional Bake and Rotisserie, plus a powerful 3600W grill, give you professional quality results.

2 Sized to Suit

Our Freestanding Range Cookers are spacious, offering 100L total and 85L of usable capacity with shelving systems and a concealed lower element providing room for even the largest family feast. The fully extendable lower drawer minimises clutter for all oven accessories.

3 Designed to Match

Designed using premium quality materials, the black reflective glass and stainless steel blend balanced aesthetic with design for durability which match the rest of our kitchen product family.

4 Easy Cleaning

Concealed elements and a drop-down grill make cleaning quick and simple. Catalytic liners break down oil and fat splashes during normal cooking. The hob is made from a single piece of stainless steel that contains spills, while the oven door and its inner pane of glass can be removed for easy cleaning.

5 Precise Control

Machined stainless steel control dials with a simple, functional interface are positioned on a fully stainless steel control panel and provide precise control over cooking temperatures.

6 Safe and Sound

A cooler to touch door and a built-in cooling system ensure the oven door is safe to touch externally. Streamlined trivets let you slide pots and pans without lifting them.

Available late 2014

COOKER HOODS

Kitchen inspiration doesn't exist in a vacuum, but simple and responsive extraction is as important as achieving the right look for your kitchen. Designed to complete your kitchen, you can select a Cooker Hood that sits above your hob or one that is hidden away until needed, depending on what best suits your kitchen layout and cooking style. No matter which you choose, all of Fisher & Paykel's ventilation products are built to perform. Whether it is a Built-in Powerpack, or Canopy-style, each has been designed as the perfect partner to our Hobs and each captures and eliminates cooking odours, vapour and steam effectively. They are easy to use and feature intuitive controls that respond to the touch of a finger.

Fisher's Paykel

Canopy Cooker Hoods

Designed as the perfect partner to our Hobs, Canopy Cooker Hoods are easy to use, easy to clean and feature intuitive controls.

1 Effective and Quiet

These Cooker Hoods offer a selection of fan speeds and clever features that quietly and efficiently remove steam and cooking odours from the kitchen. Odours can linger in the kitchen well after cooking is finished. The practical timer feature keeps the canopy working for up to 15 minutes before it automatically turns itself off.

2 Designed to Match

Fisher & Paykel's Canopy Cooker Hoods will fit any contemporary kitchen and perfectly match the Fisher & Paykel kitchen family with their black reflective glass and stainless steel.

3 Easy Cleaning

An interior, wipeable plate makes cleaning effortless. Multi-layered filters trap grease effectively. Designed for simple removal, the filters are easy to clean and dishwasher safe.

4 Precise Control

The sleek touch-control panel responds to the touch of your finger. Halogen lights provide superb illumination over the entire cooking surface. The dimmable light feature enables you to create the perfect level of light. (HC120DCXB1, HC90DCXB1, HC60DCXB1 only).

WE CONTROL THE WEATHER

At the heart of Fisher & Paykel's Fridge-Freezers is the ability to sense and respond to daily use in an intelligent way. The combination of temperature sensors with smart electronics and variable-speed fans creates a controlled environment and optimum temperature for better food care. We call it ActiveSmart™ technology. Your fridge door is the most used door in your home and, every time it is opened, the temperature changes around your food. The challenge is maintaining a consistent and controlled environment despite ongoing changes inside and outside the fridge. ActiveSmart™ achieves this through constantly monitoring how you and your family use your fridge, adjusting airflow to maintain a stable and even temperature. So despite highs, lows and occasional gusty winds, when it comes to your fridge, let ActiveSmart™ control the weather to deliver better food care.

ACTIVESMART™
TECHNOLOGY

Fisher & Paykel

90cm CoolDrawer™ Multi-temperature Drawer

The CoolDrawer™ multi-temperature drawer has been designed to change from refrigerator to freezer at the touch of a button. It is built on the concept of distributed refrigeration, combining ActiveSmart™ technology with a drawer-based design that can be placed anywhere in the kitchen, home or entertainment area. The CoolDrawer™ provides five temperature settings to deliver total flexibility – freezer, chill, fridge, pantry and wine modes, merging intelligence with convenience.

1 Innovative

The multi-temperature CoolDrawer™ is a world-first in refrigeration technology.

2 Convenient

Five temperature settings can be tailored to the needs of your food: freezer, chill, fridge, pantry and wine mode, combining intelligence with convenience.

3 Ergonomic

There is easy access at waist height, with smooth-running drawers.

4 Intuitive

The easy-to-use electronic interface can change the temperature at the touch of a button.

5 Flexible

This innovation complements your existing refrigeration and enhances your kitchen design to suit your lifestyle.

6 Precise

Highly engineered finishing ensures a 4mm clearance between front panels, as demanded by professional cabinetmakers.

CoolDrawer™ Mode Features

1 Freezer Mode

This mode is ideal for general frozen food storage with the added flexibility of three freezer functions—bottle chill, fast freeze and deep freeze. Freezer Mode is set at -18°C for longer-term storage of frozen items.

2 Chill Mode

Chill Mode sets the compartment to a temperature perfect for highly perishable meats, poultry and seafood. For these types of food it is ideal to store them at a temperature as close to freezing as possible to retain their vital freshness. Chill Mode sets the compartment at -0.5°C , just above the freezing temperature for meat.

3 Fridge Mode

This mode provides the ideal storage for most foods requiring normal refrigeration, such as fruit and vegetables, dairy products, processed meats and drinks. The compact upper storage tray is a perfect place for sensitive foods such as peaches, cherries, cheeses and deli items; the tall bin is ideal for large bottles and containers.

4 **Pantry Mode**

This is designed for foods that require a cool, dark place for storage, such as tropical fruits, tomatoes, bananas, bread and cereals. Pantry Mode provides a solution for all those foods that you didn't previously know what to do with and have always resorted to storing on the bench or in the cupboard. This setting offers a stable storage environment at 12°C, making it ideal for sensitive foods.

5 **Wine Mode**

Using the innovative Wine Mode, connoisseurs can take advantage of special settings that preserve and present wine at its optimum temperature. This mode is ideal for long-term storage of all wine at 12°C and offers two temperature selections for short-term storage.

French Door Refrigerators

This series has been designed to maximise space as well as access. With new water dispenser styling and SmartTouch controls, these fridges are designed to match with our family of kitchen appliances.

1 Fresher Food for Longer

ActiveSmart™ technology helps keep your food fresher for longer by constantly monitoring your fridge and adapting to maintain a controlled environment and optimum temperature.

2 Designed to Match

The high quality stainless steel, unique surround kits, black finish and the chrome strip detail of the slimline water dispenser, all reflect the styling of our family of kitchen appliances.

3 Easy Living

These fridges adapt to suit your lifestyle by streamlining food preparation and organisation with SmartTouch controls, flexible shelving and storage options and slide out bins and trays.

4 Sized to Suit

Fisher & Paykel French Door Refrigerators are 900mm wide and with ultra flat doors and concealed hinges, are designed to sit flush with your benchtop.

5 Easy Cleaning

Removable, spill safe glass shelves are easy to clean and contain drips and spills. Storage bins and EZKleen stainless steel doors just need a wipe to keep spotless.

6 Efficient

ActiveSmart™ fridges intelligently adapt to daily use to save energy, cooling and defrosting only when they need to without compromising on food care.

Bottom Freezer Refrigerators

This series has been designed for what you use most often. The upper refrigerator enables easy access to everyday items. With new water dispenser styling and SmartTouch controls, these fridges are designed to match with our family of kitchen appliances.

1 Fresher Food for Longer

ActiveSmart™ technology helps keep your food fresher for longer by constantly monitoring your fridge and adapting to maintain a controlled environment and optimum temperature.

2 Designed to Match

The high quality stainless steel, unique surround kits, black finish and the chrome strip detail of the slimline water dispenser, all reflect the styling of our family of kitchen appliances.

3 Easy Living

These fridges adapt to suit your lifestyle by streamlining food preparation and organisation with SmartTouch controls, flexible shelving and storage options and slide out bins and trays.

4 Sized to Suit

Available in 790 and 635mm widths these fridges suit almost any home. They can sit flush with your benchtop, with ultra flat doors and concealed hinges.

5 Easy Cleaning

Removable, spill safe glass shelves are easy to clean and contain drips and spills. Storage bins and EZKleen stainless steel doors just need a wipe to keep spotless.

6 Efficient

ActiveSmart™ fridges intelligently adapt to daily use to save energy, cooling and defrosting only when they need to without compromising on food care.

SURROUND KIT

The refrigeration Surround Kit helps create a seamless connection between your appliance and its surrounding cabinetry. Available in a stainless steel finish, the kit frames and complements the product. A Joiner Kit can also be used to join two refrigerators. For more information, visit fisherpaykel.com

ActiveSmart™ Features

1 ActiveSmart™ Technology

ActiveSmart™ technology is the combination of temperature sensors with smart electronics and variable speed fans that create a controlled environment and optimum temperature to help keep food fresher longer.

2 SmartTouch Control Panel

For easy access, the new SmartTouch control panel is placed in the inside front of the fridge. These controls have been designed to be intuitively simple and easy to use.

3 Ultra Slim Water Dispenser

The new slimline water dispenser is now even easier to use—the angled water delivery still means that almost any size or shape of vessel can be filled, while taking up no storage space in your fridge door. The black finish reflects the styling of Fisher & Paykel's family of kitchen appliances.

4 Soft-close Doors

No more slamming fridge doors or having the door left open with soft-close hinges on the French Door Ice & Water models.

5 Ice Boost

In Ice & Water models, the ice boost automatically delivers up to 25% more ice each day* into a dedicated bin that can be easily customised to store different volumes.

*compared to current Fisher & Paykel Ice & Water models

6 Humidity Control System

The Humidity Control System together with the cool and consistent temperature delivered by ActiveSmart™ technology creates the perfect microclimate in each produce bin, maintaining fruit and vegetable quality at just the right humidity and temperature level.

7 Adaptive Defrost

Adaptive defrost means that there is no need for vacation mode settings. Your fridge intelligently selects the best time to defrost based on how it is being used. When you are away it will use less energy as it recognises lower levels of use and defrosts less often.

8 Storage Flexibility

Smart fridge organisation and food preparation are streamlined with best in class features such as flexible shelving, flexible storage options and easy to access bins and trays on full extension runners.

WE LIVE OUT OF DRAWERS

Fisher & Paykel DishDrawer™ dishwashers are designed to make doing the dishes easier than ever before. The combination of a drawer-based system with smart electronics and independent wash technology delivers superior cleaning and better ergonomics. We call it DishDrawer™ technology. Each of our DishDrawer™ products is a self-contained dishwasher with technology that allows traditional double-format or separate modules to be configured at an ergonomic height, allowing complete design freedom. Wide, tall, double and single-drawer options allow you to choose the combination that works best for your lifestyle. The dishwashers in this series can be concealed easily behind kitchen cabinetry to seamlessly blend in with your kitchen and the ergonomic design minimises bending by requiring less movement to open, load and close.

DISHDRAWER
TECHNOLOGY

Playkoff

PerfectDryed

DishDrawer™ Wide

Designed for the whole family, the DishDrawer™ Wide dishwasher complements the Fisher & Paykel 900mm product series to deliver a total kitchen solution. Providing space for nine place settings, the DishDrawer™ Wide is suited to medium-sized households and can be partnered with additional drawers to cater for larger families.

1 Innovative

Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

2 Convenient

This model is taller than the standard DishDrawer™ dishwasher, so you can fit large plates up to 315mm in diameter. Racking is designed to hold long utensils and can fold away to free up space.

3 Ergonomic

The DishDrawer™ is as easy to open and close as a kitchen drawer and conveniently positioned at bench height so loading and unloading requires minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

4 Efficient

This model has the choice of nine wash programs, including Eco options to minimise water and energy usage.

5 Safe

For added safety, a key lock and child lock are included.

6 Ecofriendly

This dishwasher uses only 10L of water on a Normal Eco wash program and is AAA rated for energy efficiency and cleaning and drying performance.

DishDrawer™ Tall

This model is designed for extra headroom. The increased drawer height fits 330mm plates, making cleaning up after dinner parties a breeze. The DishDrawer™ Tall dishwasher can also easily accommodate oversized platters and extra-long stemmed glasses.

1 Innovative

Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

2 Convenient

This model is taller than the standard DishDrawer™ dishwasher, so you can fit in large plates up to 330mm in diameter. Racking is designed to hold long utensils and can fold away to free up space.

3 Ergonomic

The DishDrawer™ is as easy to open and close as a kitchen drawer and conveniently positioned at bench height so loading and unloading requires minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

4 Efficient

This model has the choice of nine wash programs, including Eco options to minimise water and energy usage.

5 Safe

For added safety, a key lock and child lock are included.

6 Ecofriendly

This dishwasher uses only 8L of water on a Normal Eco wash program and is AAA rated for energy efficiency and cleaning and drying performance.

Fisher & Paykel

DishDrawer™ Double

Designed to fit existing kitchen cabinetry, the DishDrawer™ Double dishwasher has comparable dimensions to those of traditional dishwashers but provides the benefit of two independent drawers for added convenience and ergonomics.

1 Innovative

This dishwasher is a world's first in terms of design and configuration. Before washing begins, detergent passes through the world's first flow-through dispenser to ensure it is thoroughly dissolved, providing a faster, more hygienic wash with no hint of detergent burn.

2 Convenient

The DishDrawer™ Double dishwasher lets the user match the wash program to the exact load type in each drawer.

3 Ergonomic

The DishDrawer™ is as easy to open and close as a kitchen drawer and conveniently positioned at bench height so loading and unloading requires minimal bending. Easy-to-use folding tines allow you to place large pots, platters and bowls into the drawer with ease.

4 Efficient

This model offers the choice of nine wash programs, including Eco options to minimise water and energy usage.

5 Safe

For added safety, a key lock and child lock are included.

6 Ecofriendly

This dishwasher is AAA rated for energy efficiency and cleaning and drying performance.

Fisher & Paykel

INTEGRATED MODELS

The integrated product solution enables seamless fitting between Fisher & Paykel products and your kitchen cabinetry. Your chosen aesthetic can extend beyond storage spaces to enable DishDrawer™ and CoolDrawer™ to blend in with your kitchen environment.

DishDrawer™ Features

1 Independent Drawers

An independent drawer-based dishwashing platform is part of what makes the DishDrawer™ dishwasher unique. At bench height, drawers glide open for easy access, visibility and better ergonomics. In DishDrawer™ Double dishwashers, both drawers operate independently so different wash cycles can operate simultaneously to accommodate a variety of loads. Glasses, pots and pans can be washed in separate drawers at the same time.

2 SmartDrive™ Wash Mechanism

The unique brushless DC motor acts as both a wash pump and a drain pump, which means fewer moving parts and greater reliability. The pump brings water into the spray arm, which rotates at different speeds depending on the wash cycle selected, to deliver a superior clean and better dish care. In the DishDrawer™ Wide dishwasher, two independent spray arms force water throughout the tub, ensuring maximum efficiency and ultimate wash performance.

3 Nine Wash Options

All DishDrawer™ dishwashers feature nine wash programs: Rinse, Fast Eco, Fast, Delicate Eco, Delicate, Normal Eco, Normal, Heavy Eco, Heavy. The range of settings enables the DishDrawer™ dishwasher to wash everything from fine glass and crystal to heavily soiled pots and pans at the touch of a button. Primary and secondary controls provide a simple interface for program selection and operation, while the 'delay' start setting means the dishes can be done when it's most convenient.

4 Flow-through Detergent Dispenser

The DishDrawer™ dishwasher detergent dispenser ensures that undissolved detergent does not enter into the tub; instead, it is mixed as the machine fills with water. This not only cleans each load better but also reduces the possibility of damaging delicate items such as aluminium, cutlery or porcelain glazes.

5 Superior Filtration

One of the challenges in all dishwashers is a robust filter system that removes debris and avoids blocking. Together, the kidney filter and overmoulded filter plate create a firm seal to ensure that debris does not enter the wash mechanism and cause backflow. It is designed to be removable for easy and hygienic cleaning.

6 Adjustable Racking System

The DishDrawer™ dishwasher includes a range of flexible racking options. The cutlery basket can be customised for different utensils. Folding tines can be folded flat to accommodate a full load of pots or be folded upwards to hold glassware. Pitch-adjustable racks can accommodate normal plates, deep bowls or even slide completely out of the way. Wine glass holders ensure that short and long stemmed glasses are secure throughout the wash. Added retainer clips are ideal for holding chopping boards in position.

7 Safety Features

The DishDrawer™ dishwasher incorporates unique safety features such as a child lock which both locks the drawer to prevent opening and disables the buttons. In addition, it includes three-stage flood protection: the high-strength hose withstands water pressure several times greater than normal, overfill detection cuts the water supply if limits are exceeded and the back-up switch activates the drain pump to remove any excess water.

OVEN FUNCTIONS

Oven Light

Remains lit while the oven is in use, but can also be used independently from the other cooking functions.

Bake

Heat is provided from the upper and lower elements. A traditional cooking mode, suitable for single shelf cooking of items like cakes, delicate items like sponges, custard tart and crème brûlée.

Vent Bake

Similar to Bake, but with increased ventilation of the oven cavity. This allows for a drier heat in the oven, as moisture from the food items is rapidly removed from the cavity. It provides gentle browning without the 'drying out' effect of a fan and is perfect for cooking a pavlova.

Fan Bake

The oven fan circulates hot air from upper and lower elements and distributes it around the cavity. Food browns more quickly, great for crisping pastry. Suitable for robust items like cookies, scones and muffins.

Classic Bake

Uses the heat from the lower element only. This is a traditional cooking mode which is suitable for recipes that were developed in older ovens. For best results, cook on only one shelf at a time. Perfect for foods that require delicate cooking and have a pastry base, like custard tarts, quiches and cheesecake or anything that does not require direct heat and browning on the top surface.

Pastry Bake/Fan Forced with Lower Heat

The lower heating element and fan provide outstanding cooking performance.

Roast

A two step program that has been developed to help you cook delicious roasts effortlessly. This function is a combination of grill and bake, grilling your food for the first 20 minutes it then bakes at the set temperature for the rest of your cooking time. This sears the meat to keep in the juices.

Grill

The grill element delivers heat for fast, healthy grilling. Perfect for tender meat cuts, toasting and crisping.

Fan Grill

The oven fan circulates hot air from the top element for high speed grilling and produces food with a finish that is similar to a rotisserie. Food is crisp and brown on the outside while the inside remains moist and tender.

Fan Forced

A very flexible method of cooking. A concealed element surrounding the fan at the rear of the oven heats air which is then distributed evenly around the cavity. This is the ideal mode for multi-shelf cooking and complete oven meals.

Defrost

The oven fan circulates air around the oven, speeding up the defrosting process by up to 30%.

Warm

Use this function to keep cooked food hot and to warm plates and serving dishes.

Warm

Use this function to keep cooked food hot and to warm plates and serving dishes.

Pyrolytic Self-clean

During the self-clean cycle, the oven reaches higher temperatures than it does for cooking, breaking down soil and grease deposits which can be wiped away with a damp cloth.

Rotisserie

A delicious way to cook meat and poultry. The slowly rotating food is basted continuously in its own juices, making it tender on the inside and well browned and full of flavour on the outside. This function is a combination of grill and bake, grilling your food for the first 20 minutes it then bakes at the set temperature for the rest of your cooking time.

Sabbath mode

This setting is designed for religious faiths that observe a 'no work' requirement on the Sabbath. It is used in conjunction with the Bake function.

Note: Use all oven functions with the oven door closed.

OB60N8DXTX1 60cm Built-in Conventional Compact Oven

Defrost: Using a small amount of heat in the oven the fan circulates air around the oven, speeding up the defrosting process.

Traditional: Heat is provided from the upper and lower elements. A traditional cooking mode, suitable for single shelf cooking of items like cakes and delicate items like sponges, custard tarts and creme brûlée.

Double Fan Assisted Bottom Element: Cooking is controlled by the bottom element combined with a slight dose of the grill and the fan with food placed on lowest shelf position. Recommended for moist dishes (quiches, juicy fruit tarts, etc.). The crust will be thoroughly cooked on the bottom. Recommended for dishes that rise (cakes, brioche, etc.) and for soufflés that will not be hampered by a crust formed on the top.

Grill: The grill element delivers heat for fast, healthy grilling. Perfect for tender meat cuts, toasting and crisping.

Medium Grill: Using the inner section of the grill, the grill element delivers heat for fast, healthy grilling. Perfect for tender meat cuts, toasting and crisping.

Fan Assisted Grill: The oven fan circulates hot air from the top element for high speed grilling and produces food with a finish that is similar to a rotisserie. Food is crisp and brown on the outside while the inside remains moist and tender.

Turbo Plus: A very flexible method of cooking. A concealed element surrounding the fan at the rear of the oven heats air which is then distributed evenly around the cavity.

Traditional Fan Assisted: The oven fan circulates hot air from upper and lower elements and distributes it around the cavity. Food browns more quickly: great for crisping pastry. Suitable for robust items like cookies, scones and muffins.

OS60NDTX1 60cm Built-in Steam Oven

This function is used most often and perfect for steaming vegetables and meat at 100°C.

This function is used for fragile foods such as a whole fish, steaming at a temperature of 85°C.

This function is ideal for cooking fragile fish fillets, as the temperature is a slightly lower temperature of 75°C.

This function is used for foods that need to hold their shape, such as baked eggs, stuffed tomatoes, ramekins or custard, steaming at a temperature of 90°C.

This function is ideal for heating up ready meals, steaming at a temperature of 95°C.

This function is used for gentle heating such as melting chocolate or butter, steaming at a lower temperature of 80°C.

Steaming at a low temperature of 55°C this function is ideal for slow defrosting without cooking, for foods such as defrosting fish fillets before coating with breadcrumbs or fruits that have to be kept cold for tarts and coulis.

This function is used for slow defrosting of meat before grilling, such as sausages, steaming at a temperature of 60°C.

OM36NDXB1 60cm Built-in Microwave Oven

Microwave Max: 1000W max programme.

Microwave by Levels: Programming by power level 100W - 1000W in 50W steps offering 19 power levels.

Grill High: This function lets you cook and brown foods such as gratinated dishes and meats.

Grill Medium: This function lets you cook and brown foods such as gratinated dishes and meats.

Grill High + Microwave: This function lets you use the grill and the microwave simultaneously, which makes cooking very quick. You can use any of the grill levels with microwaving, as you choose.

Grill Medium + Microwave: This function lets you use the grill and the micro-wave simultaneously, which makes cooking very quick. You can use any of the grill levels with microwaving, as you choose.

Heat Circulation: The heat circulation function lets you cook and brown foods like in a traditional oven.

Microwave + Heat Circulation: The cooking by microwave and heat circulation function saves you a lot of time. The cooking temperature can be adjusted in increments of 10°C, from 50°C to 250°C and you set the cooking time.

Defrost: Select the defrost program that corresponds to the type and quantity of food that you wish to defrost and the "automatic" function will program the required defrosting time.

Warm: Keeps food hot until you're ready. Temperature can be selected from 35°C to 100°C.

EB60DSXB1 60cm Built-in Coffee Maker

Menu: Pressing the menu icon will activate or deactivate the menu settings, scrolling through the menu and display by using the up and down arrows.

Lights: Pressing the light icon will turn the lights on and off, located above the cup tray.

Coffee Strength: The preferred coffee taste can be chosen by pressing the coffee bean icon. Preset to make coffee with a normal taste, with further options from extra-mild, mild, strong, extra-strong or a pre-ground coffee option.

Cup Size: The amount of coffee can be chosen by pressing the cup size icon. Options include, espresso, small cup, medium cup, large cup, or mug.

Single Cup: Pressing the single cup icon, will deliver a cup of coffee once the coffee strength and cup size has been selected.

Two Cups: Pressing the two cups icon, will deliver two cups of coffee once the coffee strengths and cup sizes have been selected.

Steam: When using the steam milk frother, deliver steam by pressing the steam icon followed by the OK icon. For a creamier milk froth, immerse the frother in the milk and move the container with slow upward movements. By pressing the steam icon again or ESC icon, it will stop the steam delivery.

Hot Water: Pressing the hot water icon will deliver hot water followed by the OK icon. By pressing the hot water icon again or ESC icon, it will stop the hot water delivery.

The product dimensions and specifications in this brochure apply to the specific products and models described at the date of issue. Under our policy of continuous product improvement, these dimensions and specifications may change at any time. You should therefore check with your dealer or Fisher & Paykel's Customer Care Centre to ensure this brochure correctly describes the products currently available.

You automatically receive a 2 year Manufacturer's Warranty with the purchase of a Product covering parts and labour for servicing within the country of purchase. Our products are only intended for normal domestic use in accordance with the Product's User Guide. Any defects arising from any other use are not covered.

Important Notice of Disclaimer: Our brochure contains information on a wide subject of products which we manufacture and/or sell internationally. Some particular products, models or sizes which are detailed in this brochure may not be available for sale and purchase in your area or country, if available the product may have different options to those depicted in the brochure. Before agreeing to purchase a particular product by reference to this brochure please check its availability and accuracy of its description.

This brochure is printed on paper made from sustainable forests using elementary chlorine-free pulp and vegetable based ink. This brochure represents a green choice by Fisher & Paykel to participate in the growing movement towards social responsibility.

CUSTOMER CARE
CALL 24 HOURS A DAY, 7 DAYS A WEEK.

Fisher & Paykel has a 24 hour enquiry service that allows customers to speak to a real person about any questions they might have about their products. Our Customer Care Representatives can offer advice on which appliance will best suit their needs, and provide extensive product knowledge on how to use a current Fisher & Paykel product. They can also arrange for a qualified service technician to install selected products and advise consumers where their nearest Fisher & Paykel stockist can be found. Nobody is better qualified to install, service and repair your Fisher & Paykel household appliance than our network of specially trained service technicians.
