MAKE IT WONDERFUL

# SWISS PRECISION ENGINEERING

The Franke story began as a small sheet-metal business in Rorschach, Switzerland, established by Hermann Franke in 1911. Since then, we've established efficient and economic manufacturing facilities all around the world.

Many things have changed in the past century, but what is always the same is a set of values, characterised by respect, trust and openness. The values of innovation, entrepreneurship, quality and stylish design were in the heart of Hermann Franke and continue to be at the heart of the business, as we enter a second century of smart and stunning design.
